ABOUT ME

Computer Science Engineering graduate with foundational knowledge of Python, Object-Oriented Programming, Artificial Intelligence, and workflow automation. Hands-on experience building AI and automation projects, including an AI-powered recommendation system and a safety check-in workflow using Pabbly, Telegram, and Google Sheets. Strong problem-solving, analytical, communication, and teamwork skills with an eagerness to learn and contribute to AI-driven software projects. During the career gap, prepared for TNPSC competitive examinations while continuing to develop technical skills through self-learning and practical projects.

EDUCATION

2021 - 2024 Anna University	**Mailam Engineering College** Computer Science & Engineering CGPA: 8.45
2019- 2020 HSC	**Montfort Matric Higher Secondary school** Villupuram
2008 - 2018 SSLC	**Don Bosco Matric Higher Secondary School** Chennai

TECHNICAL SKILLS

- Python (Beginner)
- Artificial Intelligence
- Object-Oriented Programming (OOP)
- Prompt Engineering
- Workflow Automation
- Generative AI

SOFT SKILLS

- Problem Solving
- Presentation
- Team Management
- Analytical Thinking
- Communication & Collaboration
- Leadership
- Training & Knowledge Sharing

PROJECTS

Safety Check-In Automation System | Pabbly, Telegram, Google Sheets
Built a workflow automation system that sends daily safety check-in messages through Telegram and records responses and activity in Google Sheets. Connected multiple tools to automate safety alerts and activity tracking with minimal manual intervention. Developed the project as part of an automation challenge and received ₹1,000 cashback for the submission.

SPAR AI – Smart Offers & Recommendation System | AI Project
Designed an AI-powered recommendation system concept that uses user preferences, budget, and location to identify relevant offers. Developed the AI workflow logic covering user inputs, offer filtering, relevance-based ranking, and personalized recommendations. Designed a dashboard concept featuring smart recommendations, search and filtering, savings insights, notifications, and user preferences.
