DEVAKI R

devaki080504@gmail.com|+91 8438858821

CAREER OBJECTIVE

Motivated MSc Physics graduate with expertise in Python, Machine Learning, Data Analysis, Climate Data Analysis, and TensorFlow. Completed an academic project on airport weather prediction using machine learning techniques. Seeking a Data Scientist, Machine Learning Engineer, or Climate Data Analyst position to apply analytical, statistical, and programming skills in developing innovative, data-driven solutions for real-world challenges while continuously enhancing my technical expertise.

EDUCATION

Master of Science in Physics
Bharathidasan University | 2024 – 2026

Bachelor of Science in Physics
Government Arts and Science College for Women
Affiliated to Periyar University | 2021 – 2024

TECHNICAL SKILLS

Programming Languages – Python, C, C++
Machine Learning – SVR, Linear Regression, Random Forest, XGBoost, Model Evaluation, TensorFlow
Libraries – NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Data Analysis Tools – Microsoft Excel (VLOOKUP, Sorting, Filtering, Charts, Data Cleaning)
, Google Sheets (Formulas, Data Handling), Data visualization, **Statistics Analysis –** Descriptive Statistics, Correlation Analysis, Feature Scaling (StandardScaler), Train-Test Split, Model Performance Evaluation
Tools & Platforms – Jupyter Notebook, Google Colab, VS Code

PROJECT

Machine Learning-Based Precipitation Prediction for Airport Weather Forecasting Using Regression Models

Developed machine learning models to predict rainfall and precipitation patterns for airport weather forecasting using meteorological datasets. Performed data preprocessing, feature scaling, model training, hyperparameter tuning, and performance evaluation using SVR, Linear Regression, Random Forest, and XGBoost with Python-based data analysis tools.

INTERNSHIP

Salem Steel Plant (SAIL) – Industrial Internship

Completed a "14-day" industrial internship and gained exposure to steel manufacturing processes, industrial instrumentation, and real-time industrial operations.

LEADERSHIP & OUTREACH

Participated in astronomy awareness and science outreach activities for students and the public. Conducted telescope observation sessions and assisted in educational science events and exhibitions.

CERTIFICATIONS

- International Astronomical Search Collaboration (NASA Affiliated) – Asteroid detection & image analysis
- Typewriting (Junior & Senior) – First Class
