SANIYA SENTHILKUMAR

Bachelor of engineering

7695903035 | saniyasenthilkumar@gmail.com | https://www.linkedin.com/in/saniya-senthil-kumar

CAREER OBJECTIVE

Intend to build a progressive career in a reputed organization within the Electronics and Communication Engineering domain, where I can realize my potential by applying my expertise in embedded systems, digital circuit design, and programming, while contributing to innovative and technology-driven solutions.

EDUCATION

2023-2027

ELECTRONICS AND COMMUNICATION ENGINEERING

Sri Shanmugha College of Engineering and Technology

CGPA - 8.91

2023

HIGHER SECONDARY SECOND YEAR

Govt Higher Sec School

81%

CERTIFICATION

Nptel- Digital Circuits

The NPTEL Digital Circuits course provides me with knowledge of binary number systems, logic gates, Boolean algebra, and Karnaugh Maps. It also helps me understand combinational circuits such as multiplexers, decoders, and adders, as well as sequential circuits like flip-flops, counters, and registers.

Udemy- Basics of Embedded C Programming

The Udemy Basics of Embedded C Programming course provides me with knowledge of C programming fundamentals, variables, data types, operators, functions, and control structures. It also helps me understand pointers, arrays, memory management, and programming concepts used in embedded systems development.

SKILLS

- Basics of Electronics
- Analog and digital circuits
- C Programming
- Embedded system basics
- AI tools - claude,gemini, Canva
- Excel, Microsoft Word

LANGUAGE

- Tamil
- English

INTERNSHIP AND TRAINING

BSNL- Implant training on Basic Telecommunication

Understood the fundamentals of telecommunication, communication networks, transmission systems, switching techniques, wireless communication technologies, and the infrastructure of modern telecom systems.

C Programming -Infineon Technologies C Programming

Completed a C Program Course and gained hands-on experience in C programming, embedded systems, and application development.

Edveon Technologies - VLSI

Completed training in VLSI fundamentals including digital design concepts, HDL basics, and verification.

LabVIEW

Trained in LabVIEW for data acquisition, instrument control, and automation using graphical programming.

ACHIEVEMENTS

- Successfully completed **25+ Embedded Systems and IoT** projects within a short span of two weeks, demonstrating strong technical skills and rapid learning ability.
- Successfully completed **30+ Analog and Digital Circuit** projects within two weeks, gaining practical experience in circuit design, analysis, and implementation.
- Secured **1st Place** in the **Quiz Competition** conducted at Sri Shanmugha College of Engineering and Technology (SSCET), showcasing strong technical knowledge and problem-solving skills.
- Actively participated in technical workshops, project-based learning activities, and engineering competitions to enhance practical and professional skills.

PROJECTS

Home Automation System Using IoT

Developed an IoT-based system to remotely monitor and control home appliances, improving convenience and energy efficiency.

Motion-Based Automatic Lighting System

Designed a system that automatically turns lights ON when motion is detected and OFF when no movement is present.

Vehicle Accident Detection System

Developed a sensor-based system that detects vehicle accidents and sends emergency alerts with location information.

Automatic Light Control System

Designed an LDR and 555 Timer-based circuit that automatically controls lighting based on ambient light conditions, enabling energy-efficient operation.

WORKSHOP AND PAPER PRESENTATION

- Attended a **3D Modeling** Workshop conducted by Bannari Amman Institute of Technology, gaining exposure to modern 3D design and modeling techniques.
- Attended a **Zero-Code Development** Workshop conducted by Coimbatore Institute of Technology, learning the fundamentals of application development without traditional coding.
- Presented a technical paper on **VLSI Technology** at Muthayammal Engineering College, enhancing knowledge in semiconductor and chip design concepts.
- Presented a technical paper on **Automatic Board Cleaner Using Arduino** at Muthayammal Engineering College, showcasing an automation-based solution using embedded systems and Arduino technology.

MEMBERSHIP

IEEE - Student membership

SOFT SKILLS

- Optimistic Person
- Team Collaboration and Leadership
- Problem-Solving Ability
- Quick Learning and Adaptability
- Time Management
- Critical Thinking
- Self-Motivation and Initiative

HOBBIES

- **Playing Kabaddi –** Develops teamwork, leadership, strategic thinking, and decision-making skills.
- **Writing Quotes –** Encourages creativity, self-expression, and critical thinking.
- **Listening to Podcasts –** Promotes continuous learning and awareness of emerging technologies and industry trends.

DECLARATION

I hereby declare that the information furnished above is true and correct to the best of my knowledge and belief
