CAREER OBJECTIVE

Cyber Security student with hands-on experience in SOC operations, security monitoring, threat detection, and phishing email investigation. Experienced with Wazuh SIEM, AWS security labs, Suricata IDS, Sophos endpoint security, and security event analysis. Seeking an entry-level cybersecurity/SOC Analyst opportunity to apply practical security knowledge in a real-world environment.

TECHNICAL SKILLS

Security Monitoring & SIEM: Wazuh, SIEM Concepts, SOC Operations, Alert Triage, Log Analysis, IOC Analysis, Security Event Analysis

Security Tools: VirusTotal, ManageEngine, Sophos, OpenVPN

Cloud Security: AWS EC2, VPC, Subnets, Security Groups, CloudWatch, CloudTrail, S3 Fundamentals

Incident Response & Threat Detection: Incident Triage, Incident Response Fundamentals, MITRE ATT&CK, Threat Detection

Email & Phishing Analysis: Email Header Analysis, SPF, DKIM, DMARC, URL Analysis, IOC Investigation

Network Security: IDS/IPS, TCP/IP, DNS, HTTP/HTTPS, Ports & Protocols, Firewall & VPN Fundamentals

Vulnerability Management: CVE, CVSS, Vulnerability Assessment Fundamentals, Patch Management Fundamentals

PROJECTS & PRACTICAL EXPERIENCE

PhishLens AI — AI-Assisted Phishing Email Investigation Platform *Python, Streamlit, Ollama*

- Developed a local phishing email investigation tool to analyze suspicious emails using security rules and a local AI model.
- Implemented email header analysis including From, Reply-To, Return-Path, Message-ID, and Authentication-Results.
- Added SPF, DKIM, and DMARC analysis, suspicious URL extraction, urgency indicators, and risk scoring.
- Integrated Ollama with Llama 3.2 to provide local AI-assisted investigation and explain security findings.
- Designed the application to support SOC-style phishing investigation and evidence-based analysis.

AWS Cloud Security Lab *AWS, EC2, VPC, S3, CloudTrail, CloudWatch*

- Configured AWS EC2, VPC, subnets, and Security Groups; enabled CloudTrail logging and explored S3-based log storage and CloudWatch monitoring for cloud security visibility.

AWS–Suricata Threat Detection Lab *AWS, Linux, Wazuh, Suricata*

- Configured a Linux-based Suricata IDS and integrated its security events with Wazuh SIEM for centralized monitoring.
- Conducted an authorized security test against the public AWS lab environment to generate network traffic for detection validation.
- Used Suricata to detect test traffic and verified the resulting IDS alerts in Wazuh, including Suricata rule 86601 and repeated alert events.
- Investigated and validated detected security events through the Wazuh Threat Hunting dashboard.

Endpoint Security & Policy Management Lab *Sophos Central*

- Configured endpoint security policies for USB transfer restrictions, web control, application control, and PUA detection.
- Performed EICAR testing to validate endpoint protection controls.

EDUCATION

B.E. Computer Science and Engineering (Cyber Security) | CGPA: 7.56
Sri Shanmugha College of Engineering and Technology, Sankari | 2023–2027
