SUMMARY

Motivated Computer Science postgraduate with hands-on experience in backend web API development using C# and .NET Core. Skilled in designing RESTful APIs, working with PostgreSQL, Oracle, and SQL Server databases, and using Swagger for API documentation. Experienced in delivering end-to-end modules for real-world industrial applications including manufacturing process tracking, machine maintenance, and inventory control. Familiar with React.js and passionate about building clean, scalable, and maintainable digital solutions.

EXPERIENCE

Web API Backend Developer

Navanala Technology Pvt. Ltd. | *Jan 2026 – Present*

- Design and develop RESTful Web APIs using **.NET Core Web API** and C#, following clean architecture and REST best practices.
- Integrate Swagger (Swashbuckle) for API documentation, enabling smooth frontend-backend collaboration.
- Work with **PostgreSQL** and **Oracle DB** for data storage, complex queries, and database management.
- **Dyeing Process Management System:** Backend system to store, track, and retrieve end-to-end dyeing process records for a textile manufacturing workflow, including a Memo/PO module for purchase management.
- **Machine Service & Maintenance System:** Backend system to handle entry, tracking, and management of service and maintenance records for company machinery, with a Memo/PO module for procurement workflows.
- Collaborate with cross-functional teams for requirement gathering, testing, and deployment of API modules.
- Apply basic **React.js** knowledge to assist with frontend integration and API consumption.

Junior .NET Developer

Scoto Systec Pvt. Ltd. | *Jan 2025 – Dec 2025*

- Developed and maintained an Inventory Management module using ASP.NET WebForms with full CRUD operations.
- Implemented data binding with SQL Server, wrote stored procedures, and optimised queries for performance.
- Designed user-friendly web interfaces, improving end-user experience across the inventory system.

PERSONAL PROJECTS

Electrical Shop Billing System *(Personal Project)*

React.js | *C# .NET Core REST API* | *Entity Framework* | *PostgreSQL* | *Antgravity IDE*

- Independently designed and developed a full-stack billing system for an electrical shop, covering product management, customer billing, and invoice generation.
- **Frontend:** Built using React.js with a clean, responsive UI for managing products, customers, and billing workflows.
- **Backend:** Developed a RESTful API using C# .NET Core with Entity Framework Core as the ORM for database operations.
- **Database:** PostgreSQL used for storing products, customers, bills, and transaction records.
- Entire project developed independently using **Antgravity IDE** for both frontend and backend development.

EDUCATION

M.Sc. Computer Science

Kongu Arts and Science College | 2023 – 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)

Dr. RANM Arts and Science College | 2020 – 2023 | CGPA: 7.4

SKILLS

Backend: C#, .NET Core Web API, ASP.NET WebForms, Entity Framework Core, RESTful API Design

Databases: PostgreSQL, Oracle DB, SQL Server, MySQL — queries, stored procedures, data modelling

Tools: Swagger / Swashbuckle, Antgravity IDE, Git, GitHub, Visual Studio, Postman

Frontend: React.js, HTML, CSS, Bootstrap, Basic JavaScript

Other: Python (Basic), OS Setup & Configuration, Agile / Team Collaboration

CERTIFICATIONS

- **Python Programming Certification** – SWAYAM, Government of India (Dec 2024) | Government-certified course covering core programming concepts, data structures, algorithms, and problem-solving.
