VIGNESH SIBI A

Data Analyst

9361974409 | sibi70154@gmail.com | LinkedIn | Github

PROFESSIONAL SUMMARY

Data Analyst with a B.Tech in Artificial Intelligence and Data Science and hands-on internship experience cleaning, analyzing, and visualizing data to support business decisions. Proficient in Python, SQL, and MySQL for data analysis, and Excel, Power BI, and Tableau for dashboard reporting. Improved analysis turnaround time by 25% during a prior internship through data cleaning and dashboard automation. Certified in Google Data Analytics, IBM Data Analysis with Python, AWS Cloud Foundations, and Tata's GenAI Data Analytics simulation. Seeking a full-time Data Analyst or Business Analyst role.

CORE SKILLS

Programming & Query Languages: Python, SQL

Databases: MySQL

Data Visualization & BI Tools: Power BI, Tableau, Microsoft Excel (Pivot Tables, Dashboards)

Python Libraries: Pandas, NumPy, Matplotlib, Jupyter Notebook

Analytical Skills: Exploratory Data Analysis, Statistical Analysis, Regression Analysis, Data Cleaning, Dashboard Creation, Data Storytelling, Critical Thinking

PROFESSIONAL EXPERIENCE

Data Analyst Intern — Gozler Ed Tech Limited *Dec 2023*

- Cleaned, structured, and validated large raw datasets, improving overall analysis turnaround time by 25%.
- Designed and built interactive Excel dashboards to track and visualize key performance trends for stakeholder reporting.
- Conducted exploratory data analysis (EDA) to surface actionable insights that directly informed business decisions.

Python Full Stack Intern — Pantech E-Learning *Jun 2023 – Jul 2023*

- Developed backend data-handling logic and integrated front-end components using Python to support functional mini-projects.
- Built and tested project modules simulating real-world application workflows, strengthening applied Python development skills.

PROJECTS

Hybrid Neural Network-Based Framework for Robust Deepfake Face-Swap Detection *Sep 2025 – Nov 2025*

- Built a hybrid deepfake detection system combining CNN, RNN, and spectral analysis with multimodal features (lip-sync and eye-movement tracking) to identify face-swapped videos.
- Applied self-supervised learning and synthetic data augmentation to improve detection accuracy on high-quality, previously unseen forgeries.

IntelliForm-AI: Adaptive OCR–Speech–Semantic Framework for Digital Form Automation *Jan 2026 – Mar 2026*

- Developed a multilingual, voice-driven document assistance system combining OCR, semantic text filtering, speech translation, and speech synthesis to automate digital form completion.
- Achieved high real-time intent-detection accuracy, improving accessibility of digital forms for underserved regional-language communities.

AI-Powered Text Summarizer & Speech Reader *Jan 2025 – Mar 2025*

- Built a tool to extract, summarize, and read aloud text from PDF, DOCX, and image files using OCR (Pytesseract), NLP (NLTK), and TTS (Pyttsx3).
- Designed a Tkinter-based GUI to improve document accessibility for visually impaired users.

EDUCATION

B.Tech, Artificial Intelligence and Data Science *2022 – 2026*

Karpagam Academy of Higher Education | CGPA: 7.5

CERTIFICATIONS

- Google Data Analytics — Coursera
- GenAI Powered Data Analytics Job Simulation — Tata Group (Forage)
- Data Analysis with Python — IBM
- AWS Academy Cloud Foundations — AWS Academy
- Modern Data Warehouse Analytics in Microsoft Azure — Microsoft
- Business Analysis & Process Management — Coursera
- Excel Basics for Data Analysis — IBM

Languages: English (Fluent), Tamil (Native), Mandarin (Basic)

Areas of Interest: Data Analytics, Business Analytics, Data Visualization
