About Me

Motivated Computer Science Engineering student with knowledge in HTML5, CSS3, JavaScript, React.js, and MySQL. Skilled in developing responsive web applications and implementing real-time features. Interested in Data Engineering, data processing, and database management. Strong problem-solving and analytical skills with a passion for learning new technologies. Seeking an entry-level opportunity to apply programming and data-handling skills to build efficient and scalable software solutions.

Projects

Hospital Patient Management System

- Built a responsive hospital management dashboard for adding, editing, deleting, and searching patient data using MySQL, Node.js, Express.js, and React.js.
- Designed and implemented backend APIs for patient and doctor management.
- Added form validation and dynamic doctor selection for a better user experience.

Nike Shoe Landing Page

- Designed and developed a responsive and visually appealing landing page using HTML5 and CSS3.
- Ensured cross-device compatibility and demonstrated strong front-end skills.

Anganwadi Child Health and Monitoring System (Mazhalaivalam)

- Developed a full-stack web application to track child health and growth records at Anganwadi centers.
- Built frontend interfaces for real-time monitoring and backend APIs for secure health record management.
- Integrated a database for structured storage and retrieval of child health information.
