EXECUTIVE SUMMARY

Electronics and Instrumentation Engineering student with strong interest in PLC, DCS, SCADA, and industrial instrumentation systems. Hands-on experience with Siemens TIA Portal, Ignition SCADA, LabVIEW, and sensor- based monitoring projects. Seeking an opportunity to contribute to industrial automation and process control environments through practical problem-solving and technical expertise.

SKILL SET

Control Logic - Ladder Diagram
Python Programming
Frontend Development

TOOLS & PLATFORMS

PLC Software - Siemens TIA
DCS - Centum VP
SCADA - Ignition SCADA
Simulation Software - Factory I/O, LabVIEW,Proteus
Coding Software - Keil µVision

AREA OF INTEREST

PLC , DCS
Industrial Instrumentation
Industrial Process Control
Sensors and Transducers

LANGUAGES

Tamil
English
Hindi (Conversational)

COURSES

DCS by Yokogawa
Embedded Systems
ARM Robotics

SOFT SKILLS

Problem Solving
Communication
Critical Thinking

INTERNSHIP

Completed a one - month Internship at **Cloud Shift Solutions** as a Full Stack Trainee Intern with Stipend

EDUCATION

B.E– Electronics and Instrumentation Engineering 2023 – 2027
Kongu Engineering College, Erode

CGPA: 7.24 (Till 6th Sem)

HSC +2– Erode Hindu Kalvi Nilayam,Erode 2022 – 2023
Percentage: 67.5%

SSLC– Erode Hindu Kalvi Nilayam,Erode 2020 – 2021
Percentage: ALL PASS

PROJECTS

PLC & SCADA Based Level and Flow Monitoring System

- Developed real-time level and flow monitoring system for a paper pulp industrial process.
- Implemented ON/OFF control logic using Siemens PLC programmed via TIA Portal.
- Designed SCADA screens in Ignition SCADA for live monitoring and alarm management.
- Integrated field sensors with PLC for automated control.
- Technologies: Siemens PLC, TIA Portal, Ignition SCADA.

Smart Soil Monitoring and Fertilizer Recommendation System

- Developed a smart system to monitor soil conditions and recommend fertilizer requirements.
- Used pH and nutrient analysis to support efficient fertilizer usage.
- Technologies Used: Arduino, Sensors, Embedded C.

Onion Storage Monitoring System

- Developed a monitoring systemtotrack storage conditions and reduce onion spoilage.
- Monitored environmental parameters to support better storage management.
- Technologies Used: Sensors, Arduino, Embedded C.

ACHIEVEMENTS & HACKATHONS

- Won 1st Prize – Paper Presentation in INSTROL 2K25 at Kongu Engineering College.
- Won 2nd Prize – Paper Presentation in GENESIS'25 at SRM University, Vadapalani Campus.
- Won 2nd Prize – Paper Presentation at Sri Ramakrishna Engineering College.
- Presented a technical paper at an event conducted by SSN College of Engineering.
