MEGHA S

Salem, Tamil Nadu | +91 9443954664 | madhumegha0605@gmail.com | linkedin.com/in/megha-s-104437353

OBJECTIVE / SUMMARY

Final-year Electronics and Communication Engineering student with a strong foundation in embedded systems, electronics, and IoT technologies. Hands-on experience with microcontrollers such as Arduino Uno and ESP32 through academic projects and internship training. Familiar with Python programming and embedded system development, with an interest in designing technology-based solutions for real-world applications. Possesses strong analytical, problem-solving, and time-management skills, along with the ability to learn quickly and work effectively in a team. Seeking an entry-level opportunity to apply technical knowledge, gain industry experience, and contribute to innovative projects in the electronics and technology domain.

EDUCATION

Vivekanadha College of Engineering for Women — ***Tiruchengode, Namakkal, Tamil Nadu***

B.E. Electronics and Communication Engineering (ECE) — April 2027 | CGPA: 7.6/10

Holy Angels Matriculation Higher Secondary School — ***Salem, Tamil Nadu***

Higher Secondary — April 2023 | Percentage: 62.1%

SKILLS

Programming: C, Python (Basics), Embedded C

Embedded Systems & IoT: Arduino, ESP32, Microcontrollers, IoT, Sensors, Actuators, Basic Electronic Circuits

Tools/Software: Arduino IDE, MS Excel, ThingSpeak

Soft Skills: Analytical thinking, problem-solving, time management, quick learning, teamwork

INTERNSHIP EXPERIENCE

Intern — Embedded Systems, Caliber Embedded Technology, Salem, Tamil Nadu — ***Jan 2025***

- Gained hands-on knowledge of C programming and embedded concepts.
- Worked with basic microcontrollers/embedded programming.

Intern — Full Stack Development, SDLC Web Development Technologies, Namakkal, Tamil Nadu — ***Jun 2025***

- Learned the basics of Python programming as part of full stack development.
- Gained introductory exposure to full stack development concepts and workflow.

Intern — Embedded Systems, Adventure Technologies Solution, Coimbatore, Tamil Nadu — ***Jun 2026 (1 Month)***

- Worked on Embedded C programming for microcontroller-based applications.
- Gained hands-on learning experience with Arduino Uno and ESP32 boards.

ACADEMIC PROJECTS

Mini Project I — Smart Wildlife Alert Tracking System using Arduino

- Developed a Smart Wildlife Tracking System using Arduino to monitor and track the movement of wildlife.
- Successfully completed the project by applying embedded systems and IoT concepts to solve a real-world problem.

Mini Project II — Arduino-Based Intelligent Wild Animal Alert System

- Developed an Arduino-Based Intelligent Wild Animal Alert System to detect the movement of wild animals near human residential or agricultural areas.
- Implemented an alert mechanism to provide early warnings and help improve safety for humans and animals.

CERTIFICATIONS

- Spoken Tutorial Certificate in Python, Computer Training, HTML, Arduino — 2024 to 2026
- IBM SkillsBuild — Generative AI Related Course, 2026
- Bajaj Manufacturing System — Bajaj Auto Ltd, 2026
- Certification of Chip Level Testing and Debugging for Smartphones and Tablets, 2025

LANGUAGES

- Tamil (Fluent)
- English (Fluent)
- Japanese (Basic)
