PROFESSIONAL SUMMARY

Computer Science Engineering student with knowledge of software development and web technologies. Experienced in projects that strengthened problem-solving and teamwork skills. Seeking a role to apply technical skills and contribute to real-world solutions.

EDUCATION

BACHELOR OF ENGINEERING **2023-2027**

KONGUNADU COLLEGE OF ENGINEERING AND TECHNOLOGY (CGPA:7.98)

SENIOR SECONDARY **2022-2023**

MALAR MATRIC HIGHER SECONDARY SCHOOL (72%)

PROJECTS

Project: AI-Based Pincode Optimization System

Tools Used:

- Python: Developed the application logic and data processing.
- Machine Learning: Identified pincode mismatches and improved routing accuracy.
- Pandas: Cleaned, processed, and analyzed postal datasets.

Description:

- Collected and analyzed postal pincode data.
- Preprocessed data using Pandas for better accuracy.
- Applied machine learning techniques to identify pincode mismatches.
- Improved postal routing and reduced delivery errors.
- Enhanced logistics efficiency through data-driven analysis.

Project: Smart Women's Safety Device

Tools Used:

- ESP32: Controlled sensor operations and managed system processing.
- LoRa SX1278: Enabled long-range wireless emergency communication.
- GPS Module: Tracked and transmitted the user's real-time location.
- GSM Module: Sent SOS alerts and location details via SMS.

Description:

- Designed a wearable safety device for women.
- Integrated ESP32 with LoRa, GPS, and GSM modules.
- Enabled emergency alerts with real-time location tracking.
- Ensured reliable communication without internet connectivity.
- Developed a low-power, long-range safety solution for emergencies.

INTERNSHIPS

Frontline Technologies - Karur **JUNE-2025**

Completed intensive training in Full Stack Web Development with hands-on experience in building responsive web applications. Strengthened skills in frontend development, backend development, database integration, REST APIs, CRUD operations, authentication, debugging, testing, and deployment.

ACHIEVEMENTS

HACKATHONS

- Finalist at Hack$Day (2025), Manakula Vinayagar Institute of Technology, for developing and presenting an AI-Based Pincode Optimization System.
- Finalist at the Hackathon conducted by CMR College of Engineering and Technology (2026), contributing to solution design and project presentation for a real-world problem.
- Presented the Food Surplus Donation Management System at VIT Chennai, contributing to system design, web application development, and project demonstration.

CERTIFICATIONS

- NPTEL Certifications: Introduction to the Internet of Things (IoT), Data Analytics, and Software Testing
- Python & Java Bootcamp – LetsUpgrade
- Jetson AI Workshop – NVIDIA Jetson AI & Edge Computing (28 Days

SKILLS

TECH SKILLS

- Programming Languages: Java, Python
- Web Technologies: HTML5, CSS3, JavaScript
- Database: MongoDB, MySQL
- Tools & Platforms: Git, GitHub, VS Code, Arduino IDE
- Design Tools: Canva

SOFT SKILLS

- Leadership: Served as Department Secretary, coordinating student activities, managing events and leading teams effectively.
- Team Collaboration: Collaborated with team members in hackathons and academic projects,contributing to solution design and project presentations.
