HARIKARAN L

Full Stack (MERN) Developer

+91 63838 47631 | hariharan91002@gmail.com | GitHub: Hari120427 | LinkedIn: harikaran84

SUMMARY

I am a Full Stack MERN Developer with hands-on experience in developing responsive web applications using modern technologies like HTML, CSS, and JavaScript. With a strong understanding of backend development through Node.js and MongoDB, I excel in creating real-world projects and reusable components, focusing on both frontend and backend integration to deliver scalable and efficient web applications

PORTFOLIO

PORTFOLIO

https://harikaran-portfolio.onrender.com

EDUCATION

Bachelor of Science in Computer Science

Government Science College

07/2021 - 05/2025 Erode

PROJECTS

Login Application

Full stack login application development

- Developed a full stack login application using JavaScript with frontend and backend integration
- Implemented user authentication, form validation, and REST API communication

Weather Application

Weather application built with JavaScript

- Built a weather application using JavaScript and external APIs to display real-time weather data
- Implemented responsive UI and dynamic data rendering

Task Management Application

Task management application with CRUD functionalities

- Created a task management application with CRUD functionality using JavaScript
- Focused on clean UI design, user interaction, and data handling

SKILLS

Gmail | GitHub | Responsive Web | HTML | CSS | JavaScript | Tailwind | React | Node.js | Express.js | MongoDB | REST | Javascript | Git | Postman

KEY ACHIEVEMENTS

Frontend Projects Completion

Completed 7+ frontend projects using HTML, CSS, JavaScript, React.js, and Tailwind CSS

User-Friendly Applications Development

Built responsive and user-friendly web applications following modern UI standards

REST API Integration

Successfully implemented REST API integration in MERN stack projects

Problem Solving Enhancement

Consistently improved problem-solving skills through real-time project development
