THIRUMALAI SIDDHAN R

rthirumalaisiddhan@gmail.com — +91 9585495544 — LinkedIn — GitHub

Career Objective

Aspiring Software Engineer with hands-on experience in Java, Python, Node.js, SQL, HTML, and CSS for full-stack development. Looking forward to joining a dynamic organization where I can apply my technical skills, collaborate in a team, and grow as a developer while contributing to a challenging and innovative technology environment.

Education

Bachelor of Engineering in Computer Science and Engineering **2023 – Present**
K.S.R. Institution for Engineering and Technology, Namakkal
CGPA: **7.88** (Up to 6th Semester)

Higher Secondary (12th) **2020 – 2021**
Acharya Higher Secondary School, Edappadi
Percentage: **70%**

Technical Skills

Programming Languages: Java, Python
Frontend: HTML, CSS, JavaScript, React
Database: MySQL
Tools: Git, GitHub, Power BI, VS Code

Internships

Power BI Intern — Stack Queue Education, Salem **June 2025**

- Designed interactive Power BI Dashboards for revenue tracking by performing end-to-end Data Cleaning, Transformation, and Power Query Modeling.
- Generated KPI-Driven Reports and Data Visualizations to analyze sales trends, delivering actionable insights for Data-Driven Decision-Making.

Java Full Stack Developer Virtual Internship **Jan 2026 – Mar 2026**

- Built responsive Full-Stack Web Applications using Java, HTML, CSS, and JavaScript, ensuring seamless frontend performance.
- Managed backend logic and Database Integration via SQL and JDBC, applying Object-Oriented Programming (OOP) to execute complex CRUD Operations.

Projects

Public Complaint Issue Tracking Portal *JReact — Node.js — PostgreSQL— JWT — Docker*

- Built a full-stack RBAC platform (Citizen/Staff/Admin) with JWT authentication, enforcing a server-side complaint status workflow (Submitted → Assigned → In Progress → Resolved → Closed) with a complete audit trail.
- Designed a normalized PostgreSQL schema and REST API with pagination, filtering, and validation; containerized the full stack (React, Express, PostgreSQL, Nginx) using Docker Compose for one-command deployment.

Resume Screening Parser using NLP *Python — SQLite*

- Developed a full-stack NLP resume screening tool using Python and Streamlit that parses resumes, extracts skills, and computes ATS match scores against job descriptions using TF-IDF/cosine similarity.
- Built a Random Forest model for candidate ranking and integrated SQLite for CRUD-based resume/JD management.

Certifications

- Java Programming Certification – GUVI
- Microsoft Power BI Data Analyst – Coursera
- Introduction to Cloud Computing – NPTEL (IIT Kharagpur)
