PAVITHRA M

Web Developer | Full Stack Developer

Namakkal, Tamil Nadu, India | 7904563719 | pavithramahudeswaran885@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Web Developer with hands-on experience in full-stack application development, REST APIs, databases, and JavaScript. Experienced in building database-driven applications using Java, Spring Boot, MySQL, and JPA/Hibernate. Strong interest in developing responsive web applications, integrating frontend and backend components, and solving real-world application problems.

TECHNICAL SKILLS

Web Technologies: HTML, CSS, JavaScript
Languages: Java, Python, SQL, Node.js
Frameworks: Spring Boot, REST APIs, JPA/Hibernate, Django
Database: MySQL, MongoDB
Tools: Git, GitHub, Maven, Postman, Eclipse

EDUCATION

Mahendra Institute of Technology (Autonomous), Namakkal *2023 – 2027*
Bachelor of Technology in Information Technology — CGPA: 8.96/10

Government Girls Higher Secondary School, Tiruchengode
Higher Secondary Certificate (HSC)

WORK EXPERIENCE

Full Stack Python Intern — Litz Tech, Coimbatore *01 Dec 2025 – 17 Dec 2025*

- Developed and styled responsive web pages using HTML, CSS, and JavaScript, ensuring consistent layout across devices.
- Built and connected backend components with Python to handle data flow between the frontend and database.
- Collaborated with the development team on debugging, testing, and refining web application features.

Full Stack Development — Cyfotok Infosec LLP, Coimbatore *Jun 2025 – Jul 2025*

- Trained in end-to-end web application development, covering frontend design and backend integration.
- Built and tested web page components under mentor guidance, following industry-standard coding practices.
- Strengthened skills in structuring web applications and applying clean, maintainable coding workflows.

PROJECTS

Drop Life — Blood Bank Management System
React, Tailwind CSS, Fast API, SQLite

- Developed a web application with separate dashboards for Donors, Hospitals, and Blood Banks to manage blood availability, requests, and donations.
- Implemented blood requests, donor matching, notifications, and admin management to help connect donors with patients who need blood.

Cryptocurrency and Fake Trading Scam Detection System
Python, Flask, ML Libraries, REST API, JavaScript

- Developed a web application to analyze cryptocurrency platforms, trading patterns, transactions, and scam indicators to detect suspicious activities.
- Implemented scam detection, risk scoring, and alerts to identify potentially fraudulent trading platforms and warn users.

SecureVault — Document & Access Management System
Java, Spring Boot, Spring Security, REST APIs, MySQL

- Engineered a secure document platform with Spring Security-based role access control.
- Configured REST APIs across 4 endpoints for document upload, retrieval, sharing, and access management.

CERTIFICATIONS

- Published a research paper at an IEEE conference held at MIT
- Infosys Springboard Certification
- Participated in MATLAB Workshop - 2026
