PROJECTS

1. **Automated Exam Hall Management System**
   Developed hall allocation and management system to streamline seating arrangements and improve examination administration efficiency.
2. **Hostel Attendance System**
   Built a Hostel Attendance System that monitors student food consumption based on their attendance and thus they will receive a discount on their fee for annual year.

MINI PROJECTS

1. Psychology Assessment Platform **GitHub Repository:** https://lnkd.in/gNt5fR76
Tech Stack: HTML5, CSS3, JavaScript
Built an interactive web-based psychological evaluation platform assessing empathy, emotional intelligence, stress handling, loyalty and decision-making.

2. Body Balance – Smart Health Analyser **GitHub Repository:** https://lnkd.in/gtSpzWYy
Tech Stack: HTML5, JavaScript, CSS3
A responsive web application that analyses health metrics and provides users with personalized health insights through an intuitive interface.

3. Digital Personality Puzzle **GitHub Repository:** https://lnkd.in/g7bxG_xd
Tech Stack: React.js, JavaScript (ES6), HTML5, CSS3
Developed a minimalist personality puzzle application delivering personalized insights based on user choices.

4. Mystery Wheel – Logic based interactive puzzle game **GitHub Repository:** https://lnkd.in/g7Vxtg5V
Tech Stack: React.js, JavaScript (ES6), HTML5, CSS3, GitHub
Implemented a three-layer rotating wheel puzzle game featuring dynamic number alignment, real-time hints to enhance logical thinking and user engagement.

CERTIFICATIONS

- NPTEL Certification | Internet of Things - Elite Silver 78% — Apr 2025
