PROJECTS

RAG
- This project is an **AI chatbot that uses RAG to answer questions from custom documents**. The system first reads and processes documents such as PDFs, converts the content into smaller chunks, and creates **embeddings** for those chunks. The embeddings are stored in a **vector database**. When a user asks a question, the system searches the vector database for the most relevant information and sends the retrieved content to an **LLM** to generate an accurate and context-based answer.

Software Billing
- Developed a web-based billing application with Node.js backend and vanilla JavaScript frontend, featuring OTP authentication, real-time discount management, inventory management, and WhatsApp bill sharing with complete CRUD operations persistence.

INTERNSHIP

ATmega Software Technologies LLP 27/07/2026 – 27/09/2026 Erode
