Career Objective

Eager to enhance my expertise and grow a fulfilling career with an organization that fosters innovation, creativity, and forward-thinking solutions.

Education

B.Tech – Artificial Intelligence & Machine Learning
Kongu Engineering College, Perundurai
2026 — CGPA: **6.53**

Higher Secondary (HSC)
Senthil Public School, Salem
2022 — **62%**

SSLC
Senthil Public School, Salem
2020 — **69.40%**

Technical Skills

Data Analysis: Power BI, Tableau
Databases: MySQL
Programming: Java,Python

Soft Skills

Teamwork
Adaptability
Time Management

Coursework

Data Analysis
Database Management Systems
Big Data Analytics

Certifications

- **NPTEL:** Design & Implementation of Human–Computer. Interface
- **NPTEL:** Responsible And Safe AI Systems.

Achievements

- Finalist — 24-hour HackSphere Hackathon

Projects

A Comparative Analysis of Deep Learning Tehniques for English-Tamil Text Translation

- Built a deep learning-based English–Tamil translation system using Seq2Seq with Attention and Transformer architectures.
- Applied subword tokenization to improve translation performance for low-resource language data.
- Evaluated model performance using BLEU and chrF metrics for quality comparison.
- Compared traditional encoder–decoder models with Transformer-based architecture.

Netflix Movie Analysis using Power BI

- Analyzed Netflix movie and TV show data to identify content trends based on genre, release year, and country.
- Created interactive dashboards to support business insights such as audience preferences and content growth patterns.

Guest House Booking System

- Developed a web-based guest house booking system with an interactive 360-degree view.
- Implemented a booking workflow with admin controls to review, accept, or reject requests.

Publications

- Machine Learning Model for Glass Type Prediction," in 2024 3rd IEEE International Conference on Advances in Technology (ICONAT) DOI: 10.1109/ICONAT61936.2024.10774722
