GOBICA A

Erode, Tamil Nadu | +91 9677100417 | gobicaamul2005@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Information Technology undergraduate (CGPA 9.45/10) with hands-on experience across full-stack web development, backend engineering with Java and Spring Boot, and computer vision. Skilled in Java, Python, SQL, REST API development, and Power BI, with a track record of building real-time applications and automated dashboards that improved reporting efficiency by 20%. Strong foundation in OOP, Git/GitHub workflows, and Agile development practices, seeking to apply these skills in a software development or backend engineering role.

EDUCATION

Mahendra Institute of Technology (Autonomous), Namakkal *2023 – Present*
Bachelor of Technology in Information Technology | CGPA: 9.45/10

Government Girls Higher Secondary School, Bhavani *2021 – 2023*
Higher Secondary Certificate (HSC)

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL
Java Framework: Spring Boot
Web Technologies: HTML, CSS
Databases: MySQL, JDBC
Data & Analytics: Power BI, Microsoft Excel
Tools: Git, GitHub, JUnit, REST API

WORK EXPERIENCE

Full Stack Python Intern — Litz Tech *Dec 2025*

- Developed responsive full-stack web applications (Python, HTML, CSS, JavaScript) and built automated dashboards that improved reporting efficiency by 20%.
- Applied systematic testing and debugging to strengthen application reliability, collaborating in an Agile environment through design discussions and code reviews.
- Managed version control and cross-team collaboration using Git and GitHub throughout project releases.

PROJECTS

Face Detection and Age-Gender Classification System

Python | OpenCV | Machine Learning

- Built a real-time face detection application using Python and OpenCV, processing live video input with low latency.
- Implemented age-group prediction and gender classification models using machine learning and computer vision techniques.
- Engineered an image-processing pipeline for face detection and classification, optimizing for both accuracy and processing speed.

Job Portal Application

Java | Spring Boot | MySQL | REST API

- Developed a web-based Job Portal Application that connects job seekers with recruiters, allowing users to register, search, and apply for jobs.
- Enabled recruiters to post job openings and manage applications through a dedicated recruiter workflow.
- Implemented REST APIs and integrated MySQL using Spring Boot and Spring Data JPA to manage users, jobs, and application data.

GeoSense AI

Location Intelligence | Mapping APIs

- Developed a location-based navigation application to help users discover nearby hospitals, shops, tourist attractions, and essential services.
- Implemented location-aware search and recommendation features using mapping and location-intelligence APIs.

CERTIFICATIONS

- Python for Beginners — OpenCV
- Python 101 for Data Science — Unito Latino Student Association
- Mastering Python, Pandas & NumPy for Absolute Beginners — Udemy
- Artificial Intelligence Fundamentals — IBM SkillsBuild
- Java Fundamentals — SimpliLearn
