  Percentage – 100 %

Skills :

- Java
- Html
- Css
- Git
- Web developing
- Vs code
- Sql
- Full Stack

Project:

Placement Assistant:-

Developed a web-based Placement Assistant system to help students prepare for campus placements by providing job notifications, aptitude practice tests, interview preparation resources, and resume guidance on a centralized platform. Implemented features for student profile management, performance tracking, and admin-based job posting to improve placement readiness and streamline coordination between students and placement coordinators.

Medical Laboratory Management system:-

Developed **Medi**, a comprehensive Medical Laboratory Management System using React and Firebase. Engineered a secure, role-based platform featuring a dedicated patient dashboard, automated diagnostic report generation, and an integrated billing module. Streamlined lab workflows by enabling staff to efficiently manage patient records, test categories, and system access controls.
