SUMMARY

Currently pursuing a degree in Information Technology with skills in programming, networking, and database management. Eager to learn and apply technical knowledge to real-world challenges. Looking for opportunities to gain hands-on experience in the IT field.

PROJECT

Bus Management System

- Created a bus scheduling, ticket booking, and route management system.
- Integrated real-time seat selection and online payment.
- Created an admin panel for bus operations and user management.
- Integrated APIs for route optimization and alerts.
- Tech stack: HTML, CSS, JavaScript, Python (Django)/Java (Spring Boot), MySQL/PostgreSQL.

PROFESSIONAL EXPERIENCE

MACHINE LEARNING INTERN | ST SOFTWARE

- Emotion Detection System (St Software solutions (Internship Project)
- Developed a real-time facial emotion detection system using TensorFlow, OpenCV
- Trained and ine tuned a deep learning model for emotion classification.
- Integrated the model nto a Flutter app for real-time emation recognition.
- Improved model accuracy and optimized performance for real-world applications

EDUCATION

Bachelor of Information Technology

Mahendra Engineering College CGPA:7.3

HSC

Swamy Vivekanandha vidhalaya matric Hr sec school

Percentage: 71%

CERTIFICATION

Introduction to MongoDB for Students

Issued by MongoDB, Inc. (2024) Learned fundamental concepts of NoSQL databases and MongoDB architecture. Covered topics such as CRUD operations, indexing, aggregation framework, schema design, and data modeling
