Information Technology graduate with **hands on experience** in **Data Analytics, Artificial Intelligence and Machine Learning and Cybersecurity**. Developing **intelligent prediction and monitoring systems** using **Python, TensorFlow, Scikit-learn, Power BI,** and **building applications** through **NLP's,** shifting from **writing code to guiding AI agents**. **Skilled** in **data analysis, visualization, ML model development, threat detection, and smart system design.** Seeking opportunities for **data analyst**, data-driven solutions that **improve automation, security**, and decision-making.

SKILLS

AI/ML	Deep Learning Basics, Data Preprocessing, Model Training & Evaluation, Predictive Analytics, NLP Basics, Classification Algorithms, KNN, CNN, AI Model Deployment Basics.
Programming & Development	Python, basic C, HTML, CSS, SQL, Object-Oriented Programming, Problem Solving, Debugging.
Data Science & Analytics	Data Analysis, Data Visualization, Pandas, NumPy, Matplotlib, Power BI, Report Generation, Data Cleaning & Transformation.
Cybersecurity & Network Security	Honeypot Systems, Threat Detection Secure Authentication, Vulnerability Analysis.
Web & App Building	Frontend Development, Responsive Web Design, UI/UX Prototyping, Figma.
Cloud & Tools	Git & GitHub, Google Colab, Jupyter Notebook, VS Code, Anti gravity, Power BI, MySQL, Firebase Basics.

EXPERIENCE

PYTHON DEVELOPER | ST SOFTWARE | TIRUPPUR | SEP - OCT 2025

- **Developed** and **maintained Python-based applications** and tools for **internal and client projects.**
- Working with **frameworks** such as **TensorFlow, OpenCV,** for **machine learning and web-based solutions**.
- **Collaborating** with **cross-functional teams** to **design, build,** and **deploy scalable applications.**
- **Debugging, optimizing, and testing code** to ensure **high performance and reliability.**

MACHINE LEARNING INTERN | TEKU RAZA LLP | COIMBATORE | FEB - MAR 2025

- **Crop diseases detection system** , which is an **AI-based system** to **detect** and **classify crop diseases** using **satellite and drone imagery.**
- **Preprocessed multi-spectral** and RGB data, applied **CNN models** for disease recognition, and enhanced **detection using NDVI features.**
- **Achieved** over **90% accuracy** on real-world datasets. The solution **helps farmers** take timely **preventive actions, promoting smart and sustainable agriculture.**

PROJECT

- Created a **real-time driver monitoring system** to **detect fatigue and emergencies**, enhancing **road safety with 90% detection accuracy.**
- Developed an **AI-based crop disease detection system** using satellite and drone imagery. Applied CNN models and NDVI features to achieve over 90% accuracy in real-world datasets.
- Implemented a **cybersecurity honeypot using Cowrie** to **monitor and log malicious activities**. Analyzed **attacker behavior and visualized threats** using **Python dashboards** for security insights.

CERTIFICATES

- Machine Learning
- Power BI
- Langchain and LLMs

EDUCATIONAL BACKGROUND

Bachelor of Technology in InformationTechnology
Mahendra Engineering College,Namakkal
