PROFESSIONAL SUMMARY

Final-year Computer Science and Technology undergraduate (CGPA 8.7/10, graduating 2027) who completed PwC's Advisory Launchpad Program, gaining hands-on training in AWS and Azure cloud fundamentals. Backend development experience with Python (FastAPI, Flask) and applied AWS cloud storage in a production-style system. Seeking an entry-level Cloud Engineering role to apply and deepen this foundation.

TECHNICAL SKILLS

Cloud: AWS (Basic), Microsoft Azure (fundamentals)
Programming: Python, SQL
Backend & Web: FastAPI, Flask, REST APIs, Node.js
Databases: PostgreSQL, MySQL
Tools & Practices: Git, GitHub, Linux, Jenkins, Power BI
Core CS: Computer Networks, DBMS, Data Structures, OOP

INTERNSHIP EXPERIENCE

Full Stack Development Intern | Odugaa Tech, Salem *Jun 2026 (15 days)*

- Owned the CRM module of a company ERP system end-to-end (frontend, backend, database) using FastAPI, PostgreSQL, and HTML/CSS/JS as part of a 3-person team, using AI-assisted tools to accelerate delivery.

Python Development Intern | Cybernaut *Nov 2025 – Feb 2026 (Part-time)*

- Independently built an end-to-end IMDb movie rating prediction system: web scraping with BeautifulSoup and Selenium, ML model training, and a Flask web app to serve results.

Data Analyst Intern | Codec Technologies *Dec 2025 – Jan 2026 (Part-time)*

- Built a real-time cryptocurrency price tracking and analytics dashboard (Python, Streamlit) with live price monitoring, historical trend analysis, and automated price-movement alerts.

PROJECTS

Face Recognition-Based Medical History System | Python, dlib, OpenCV, AWS
github.com/kani0305/Face-Recognition-based-medical-histry-identification-system

- Independently developed a facial recognition system (dlib) to identify patients and auto-retrieve medical records, storing patient data in AWS cloud storage for cloud-based access.

SpotLink — Smart Parking Discovery App | React, Node.js, Google Maps API
github.com/kani0305/Spotlink_ai

- Independently built a full-stack parking marketplace connecting drivers to homeowner-listed spaces, using the Google Maps API for location-based discovery and booking.

Beyond Sight — AI-Powered Accessible Learning App | Flutter, Dart, Google ML Kit
github.com/kani0305/Beyond_sight

- Co-built (5-person team) a mobile app converting educational diagrams into voice-based lessons for visually impaired students; owned on-device OCR and voice navigation.

EDUCATION

Bachelor of Engineering, Computer Science and Technology

Vivekanandha college of engineering for women *2023 – 2027 (Expected)*
CGPA: 8.7/10 | Relevant Coursework: Cloud Computing, Computer Networks, DBMS

Higher Secondary Certificate - Government girls higher secondary school *2021-2023*
77%

CERTIFICATIONS & PROGRAMS

- PwC Advisory Launchpad Program — Completed; hands-on training in AWS and Azure cloud fundamentals
- Data Science for Engineers — NPTEL
- Machine Learning & SQL — Simplilearn
- Generative AI Studio — Google Cloud / Simplilearn

ACHIEVEMENTS

- Winner, Full Stack Development Hackathon — CyberDrake (1st place among 20 competing teams)
- Ranked 2nd, Computer Science and Technology (3rd Year) among 55 students, Vivekanandha College of Engineering for Women
