Education

Mahendra Institute of Technology — Namakkal
B.Tech in Information Technology - CGPA: 9.6 — *2023 - 2027*

Sathyam Matriculation Higher Secondary School — Harur
Maths Biology — *2021 - 2022*

Experience

Python Full Stack Intern — July 2026 – August 2026
Tech Vedhu — *Bengaluru*

- Gained hands-on experience in Python fundamentals, variables, data types, operators, and conditional statements.
- Applied loops, functions, and data structures such as lists, tuples, sets, and dictionaries to develop basic programs.
- Practiced string handling, exception handling, and file handling for data processing and application development.
- Worked with Python modules and packages to organize and reuse code efficiently.
- Applied Object-Oriented Programming (OOP) concepts including classes, objects, methods, and inheritance.

Full Stack Development Intern — June 2025 – July 2025
CYFOTOK INFOSEC LLP — *Coimbatore*

- Completed an intensive 3-week full-stack developmentl Iraining program, gaining hands-on exposure to both lironlend and backend developmcnt layers.
- Collaborated with senior developers on live project work, integrating frontend and backend components into a unified, functional application
- Practiced real-world development workflows and adopted coding habits aligned with production-grade standards.
- Contributed to end-to-end application development, strengthening practical understanding of the full software development lifecycle.

Full Stack Python Intern — December 2025
Litz Tech

- Developed and shipped 5+ backend features in Python, identifying and resolving recurring bugs to improve application reliability during QA cycles
- Collaborated with a mentor-led team to debug and refine 3 core web application modules, reducing defects flagged during internal code reviews
- Gained hands-on exposure to full-stack development workflows, supporting feature delivery from backend logic through deployment

Projects

Smart Product Comparison & AI Recommendation System | *Python, Flask, MySQL, HTML, CSS, JavaScript.*

- Developed a full-stack Flask web application that enables users to compare product prices, ratings, and details across Amazon, Flipkart, and Meesho.
- Implemented product search, category/brand filtering, sorting, wishlist, user authentication, and product comparison features.
- Developed a Smart Deal Score using product price and rating factors to help users identify better-value products.
- Built AI recommendation functionality to present relevant product options based on product attributes and comparison results.
- Designed a responsive user interface using HTML, CSS, JavaScript, and Bootstrap, optimized for desktop and mobile devices.
- Implemented MySQL database integration for storing and managing product and user-related data.

Simple Web-Based CRM System Using Flask | *Python,Flask,SQLite,HTML,CSS,Bootstrap.*

- Developed a Flask-based CRM web application for customer record management, implementing Create, Read, Update, and Delete (CRUD) functionality with SQLite.
- Built features including customer search, dashboard, customer details, record editing, and deletion using Flask routes and HTML templates.
- Designed a responsive web interface using HTML, CSS, and Bootstrap and documented project setup, dependencies, and execution using README.md and requirements.txt.

Technical Skills

Programming: Python
Web Technologies: HTML, CSS, Flask
Database: MySQL, SQL
Tools: Git, GitHub, VS Code
Core Concepts: Data Structures, OOP, Exception Handling, File Handling, Problem Solving, Debugging
