CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student seeking an entry-level position in a company. Eager to apply my technical skills, Japanese language knowledge, and willingness to learn while contributing to the organization's growth and continuously improving my abilities.

ACADEMIC PROJECTS

- **Design of Low Power APB-Based Register Module using Verilog HDL**
  - Designed an APB-based register module using Verilog HDL.
  - Reduced power consumption through optimized register design.
  - Simulated and verified the functionality using ModelSim**.**
- **Optimized High-Performance 32-bit Booth Multiplier using Verilog HDL**
  - Designed a 32-bit Booth Multiplier using Verilog HDL.
  - Optimized the design to improve multiplication speed and reduce delay.
  - Simulated and verified the design using ModelSim.

INTERNSHIP

Software Development Intern
Frontline | June 2025

- Assisted in developing Java-based applications.
- Worked with HTML, CSS, JavaScript to build web pages.
- Tested and debugged software to improve performance.
- Collaborated with team members using Git for version control.
