SUNITHANANDINI S

Erode, Tamil Nadu

+91 9791634484 sunithanandinisa4484@gmail.com sunithanandini-s

Profile Summary

Aspiring IT professional with a keen interest in programming and software development. An enthusiastic Electronics and Communication Engineering student at **NANDHA ENGINEERING COLLEGE**, with practical experience in Python-based projects, embedded systems, and IoT applications. Passionate about leveraging technology to build innovative solutions, with a continuous drive to learn and grow in automation and AI-powered systems.

Education

B.E. in Electronics and Communication Engineering 2023 – 2027

Nandha Engineering College (Autonomous), Erode *CGPA: 8.5*

Skills

Technical Skills

Programming Languages: Python, Java Basic
Embedded Systems
IoT Development
PCB Design & Fabrication
Python-based Applications

Soft Skills

Leadership & Team Coordination
Creativity & Innovation
Decision Making
Problem Solving
Analytical Thinking

Projects

Voltage and Battery Capacity Checker *Embedded Electronics Project*

- Built a hardware-oriented project to measure voltage levels and estimate battery capacity for monitoring applications.
- Applied electronics fundamentals, component interfacing, and testing skills during implementation and validation.

Vision-Based Avocado Leaf Disease Identification System Using Integrated Camera *Embedded / AI Project*

- Developed a vision-based system for identifying avocado leaf diseases using an integrated camera and image-based analysis.
- Applied Python-based programming and image processing concepts to capture and analyze leaf images.
- Designed the system to support automated disease identification and assist in early detection of plant health issues.

IoT and Embedded Application Mini Projects *Academic and Training Work*

- Developed mini projects using embedded systems and IoT concepts through simulation and hardware platforms.
- Strengthened understanding of sensors, microcontrollers, communication protocols, and real-time embedded applications.

Inplant Training and Internship

Inplant Training – Indian Institute of Technology, Chennai June 2025

- Completed a 10-day inplant training on Embedded Systems, IoT, and application-driven electronics.
- Gained practical exposure to embedded development and industry-oriented workflows.

Internship – Caliber Embedded Technologies January 2026

- Completed an internship focused on Embedded IoT concepts and implementation.
- Gained practical exposure to structured development practices, technical collaboration, and project execution.

Certifications

- Introduction to IoT – NPTEL (Elite + Silver)
- Cloud Computing
- Ethical Hacking
