OBJECTIVE

I consider myself a responsible and orderly person. Highly motivated and adaptable engineering graduate eager to contribute to innovative projects and solve real-world challenges. Seeking a dynamic role that offers opportunities for continuous learning and professional growth.

SKILLS

- C
- Java.
- PCB Design
- Embedded C.

CERTIFICATIONS

- PCB Designing.
- Java Programming – LeetCode Python.
- NPTEL – Introduction to Industry 4.0 & IoT.

AREA OF INTEREST

- PCB Design
- Embedded System

CO-CURRICULAR ACTIVITY

Workshop, Antenna Design
Attended a workshop on "Antenna Design" at an Inter-College Event.

Paper Presentation
Presented a paper on "Neuromorphic Computing".

Paper Presentation
Presented a paper on "Advanced Prosthetic Limbs".

Hackathon Presentation
Presented a hackathon on "Smart Parking System"

EXPOSURE

Full Stack Development, *Mee Technology,* Salem. 2025 June
Building dynamic web applications by developing with php and webpack frontend bundling processes bridging seamless interactions between server.

EDUCATION

Kongunadu college of engineering and technology,
Electronics and Communication Engineering. 2024 Present
CGPA: 7.44

Kongunadu polytechnic college,
Diploma – Electrical and Electronics Engineering. 2024
92%

Sowdambikaa Matric Higher Sec School,Thottiyam, HSC. 2022
60%

Sowdambikaa Matric Higher Sec School,Thottiyam,SSLC. 2020
89.4%

PROJECTS

IoT Based Smart Monitoring System For Mining Workers

- Developed an IoT based safety monitoring system using ESP32, IoT sensors, Embedded C for real-time worker health environmental monitoring.
- Designed an automated alert mechanism using MQTT and Wi-Fi communication to notify authorities during emergency situations.
- Integrated Blynk platforms for remote monitoring, real-time data storage, and visualization through a dashboard.

Driver Health and Drowsiness Monitoring System using IoT

- Developed a driver monitoring system using ESP32, OpenCV, and Python to detect drowsiness through real-time eye-blink analysis.
- Integrated Pulse Sensor, ESP32, and Embedded C to monitor driver health parameters and identify abnormal conditions using predefined threshold values.
- Implemented Blynk Wi-Fi Communication, and Cloud Dashboard for real-time alert generation, remote monitoring, and data.

EXPERIENCE

TEXMO INDUSTRIES, Coimbatore. 2024 April
Completed a 3-month internship at Texmo Industries with hands-on experience in production and quality control. Gained practical exposure to industrial processes and engineering operations.
