PROJECTS

1. **Smart Street Light Fault Detection Using Embedded Systems**

- Developed an embedded system using sensors and a microcontroller to detect faulty street lights automatically.
- Implemented real-time fault monitoring and automated alerts to improve maintenance efficiency.

2. **AI-Based Entity Detection Using ESP32-CAM**

- Developed an AI-based entity detection system using the ESP32-CAM for real-time image processing.
- Integrated Wi-Fi-enabled image capture and remote monitoring for smart surveillance applications.

3. **Smart India Hackathon (SIH) 2025 – Smart Waste Monitoring and Management**

- Developed an IoT-based smart waste monitoring system to track garbage bin levels in real time.
- Designed route optimization and predictive analytics to improve waste collection efficiency and urban sanitation.
