PROJECTS

SMART HELMET USING IoT ALCOHOL DETECTION

My project aims to reduce road accident by preventing alcohol detection. The system provided effective solution for road safety and responsible driving habit.The Smart Helmet using IoT and Alcohol Detection is an intelligent road safety system designed to prevent drunk driving and reduce two-wheeler accidents. By integrating Internet of Things (IoT) sensors with a holmet and the vehicle's ignition system. It ensures that a rider cannot start the motorcycle without wearing the helmet and passing a sobriety text.

ACHIEVEMENTS & HACKATHON:

I participated in the NIRAL Government Hackathon and our team won at the state level. We created a project on digital growth monitoring and attendance in ICDS. We received a cash prize of ₹15,000. This achievement improved my skills and confidence.
