Education

B.E (Computer Science and Engineering)
Kongunadu College of Engineering
CGPA : 7.78 / 10 2023 - 2027

Higher Secondary Certificate (HSC)
Devi Matriculation Higher Secondary School
Percentage : 78 % 2022 - 2023

Secondary School Leaving Certificate (SSLC)
Devi Matriculation Higher Secondary School
Percentage : 100 % 2020 - 2021

Skills

Programming language

- C
- JAVA

Frontend

- HTML
- CSS
- JavaScript
- Bootstrap

Frontend

- MySQL, MongoDB
- Bootstrap

Tools

- Git & GitHub
- Figma

Certification

- Full Stack Development Certification – CSC.
- Full Stack Development Internship – Frontline Technologies

Achievements

- ANRF Hackathon – Finalist
- Smart India Hackathon (SIH) – Participant
- KHACK 3.0 – Hackathon Participant
- VIT Chennai Hackathon – Participant

DANIEL RAJ S

Final-year Computer Science Engineering student with hands-on experience in full-stack web development through internships and academic projects. Proficient in building responsive web applications using Python, Django, JavaScript, HTML, CSS, Bootstrap, MongoDB, and MySQL. Strong foundation in software development, problem-solving, and collaborative development, with a focus on building scalable and user-centric applications.

Experience

Full Stack Development Intern – Frontline Technologies

Jun 2025 - Present

- Developed responsive web pages and user interfaces using modern web development practices.
- Collaborated with the development team to implement frontend features and understand end-to-end application workflows.

Python with Machine Learning Intern – AICET

Sept 2024 - Oct 2024

- Performed data preprocessing and data cleaning to prepare datasets for machine learning models.
- Assisted in training and evaluating machine learning models using Python under project guidance.

Projects

Seed to Selling – Agriculture Supply Chain Platform

Tech Stack: Python, Django, HTML5, CSS3, JavaScript, Bootstrap, MongoDB

Description:

- Developed a full-stack marketplace that enables farmers to sell agricultural products directly to consumers.
- Implemented multilingual support and weather information to improve accessibility and assist farming decisions.
- Built responsive user interfaces and integrated backend functionalities for product management and user interactions.

AI-Powered Government Scheme Assistant

Tech Stack: Python, Django, JavaScript, HTML5, CSS3, Bootstrap, MongoDB, Gemini API

Description:

- Developed a full-stack web application that helps citizens discover government welfare schemes through an AI-powered conversational interface.
- Integrated Gemini LLM to generate context-aware responses and improve user interaction.

CarbonIQ – Industrial Carbon Intelligence Platform

Tech Stack: Python, Django, JavaScript, HTML5, CSS3, Bootstrap, MongoDB, Machine Learning(Ensemble Regression) + Gemini API

Description:

- Developed a full-stack web platform to monitor and analyze industrial carbon emissions using machine learning predictions.
- Built interactive dashboards to visualize emission trends, sustainability metrics, and source-wise analytics for better decision-making.
- Integrated AI-powered analytics and model comparison features to provide emission insights with high prediction accuracy.
