| Github | LinkedIn |

CAREER OBJECTIVE

An enthusiastic and self-motivated B.Tech Artificial Intelligence and Data Science student with hands-on experience in Java, Python, SQL, and Power BI. Eager to begin a career in software development, data analytics, and emerging technologies. Seeking to apply technical and problem-solving skills to real-world projects while continuously learning and contributing effectively to a dynamic organization.

EDUCATION

Arunachala College of Engineering for Women *Manavilai, Tamil Nadu*

B.Tech in Artificial Intelligence & Data Science — CGPA: 8.45/10

Expected Graduation: 2027

Christ the King matric hr. Sec. School (2022-2023) *kannumamoodu, TamilNadu*

Percentage : 73%

Christ the King matric hr. Sec. School (2019-2020) *kannumamoodu, TamilNadu*

Passed

TECHNICAL SKILLS

Languages: Java, Python, Flutter, SQL

Databases: MySQL

Tools & Platforms: Git, GitHub, Power BI, n8n (Workflow Automation)

Core Concepts: OOP, Data Structures, SDLC, Problem Solving

INTERNSHIP EXPERIENCE

Srishti Innovatives — Software Development Intern *Jun 2026 – Jul 2026*

- Developed and enhanced Java-based software modules within an agile team environment, applying Object-Oriented Programming principles to build clean, reusable code.
- Collaborated with mentors and cross-functional team members throughout the software development lifecycle (SDLC), from requirement discussions to feature implementation.
- Debugged and tested application modules using systematic troubleshooting techniques, improving functional reliability before deployment.
- Used Git/GitHub for version control to track changes and coordinate code collaboration across the project.

Plasmid — Data Analytics Intern *May 2025 – Jul 2025*

- Built interactive Power BI dashboards to visualize key business metrics, enabling stakeholders to make faster, data-driven decisions.
- Cleaned, transformed, and structured raw datasets to improve data accuracy and consistency for downstream analysis.
- Analyzed real-world datasets to uncover trends and patterns, translating findings into clear, actionable business insights.
- Delivered visual reports and presentations summarizing key findings to support internal decision-making.

PROJECTS

AI Chatbot using n8n | *n8n, Workflow Automation, REST APIs, AI Integration*

- Designed and deployed an AI-powered chatbot using n8n's low-code workflow automation platform, integrating external AI APIs to handle conversational logic.
- Automated multi-step conversation flows, reducing manual intervention and improving response consistency.

Healthcare Analytics Dashboard | *Power BI, DAX, SQL, Data Visualization*

- Built an interactive healthcare analytics dashboard consolidating multi-source data into unified KPI views.
- Designed dynamic charts, filters, and drill-down reports to visualize healthcare metrics, supporting quicker, data-informed decisions.

ATM Simulation System | *Java, OOP, File Handling, Data Structures*

- Engineered a console-based ATM simulation system in Java, applying OOP concepts (encapsulation, inheritance) for modular, maintainable architecture.
- Implemented secure user authentication, account management, and transaction processing (deposit, withdrawal, balance inquiry) modules.
- Integrated file handling for persistent data storage, replicating real-world banking transaction workflows.

PATENT

IoT-based Collision Detection When Two Trains are approaching on the same Track
Application No: 202541097285
Published on October 10, 2025

CERTIFICATIONS

- Google Skills Boost — Cloud/AI Learning Program
- Power BI Certification — Data Visualization & Dashboarding
- Internship Completion Certificates — Srishti Innovatives (Software Development) & Plasmid (Data Analytics)

Languages: English, Malayalam, Tamil | **Soft Skills:** Team Collaboration, Communication, Adaptability, Time Management
