SUMMARY

Motivated and detail-oriented MERN Stack Developer with hands-on experience in building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in developing responsive user interfaces, designing RESTful APIs, integrating databases, and implementing secure authentication systems. Experienced with Git, GitHub, Tailwind CSS, Firebase, MySQL, and Figma.

SKILLS

HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Python, Java, Node.js, Express.js, MongoDB, MySQL, Firebase, Microsoft Word, Microsoft Excel

EDUCATION

Bachelor of Computer Science and Engineering — Anna University,JEC *Aug 2022 - June 2026*
CGPA - 8.7

HSC— Government Higher Secondary School *Jun 2020 - Mar 2022*
Percentage - 78%

SSLC — Government Higher Secondary School *Jul 2015 - Mar 2020*
Percentage - 87%

CERTIFICATIONS AND TRAINING

HackerRank, MongoDB, Red Hat, NxtWave OpenAI, UI/UX Design,Altruisty

INTERNSHIPS

MERN Stack Developer Intern *Aug 2025 - Sep 2025*
Edoras

Completed a MERN Stack internship focused on developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Developed RESTful APIs, fixed application bugs, and collaborated with the development team using Git and GitHub. Gained practical experience in writing clean, maintainable code and following industry-standard development practices.

Full Stack Developer Intern *Jun 2025 - Jul 2025*
Mind IT

Worked as a Full Stack Developer Intern, contributing to the development of web applications using modern technologies. Integrated REST APIs, performed application testing, and assisted in deployment activities. Improved my understanding of the complete software development lifecycle and strengthened my problem-solving skills.

Frontend Developer Intern *Dec 2023 - Jan 2024*
Technohacks

Developed a responsive company website using React.js and Tailwind CSS. Designed and implemented reusable UI components to improve code reusability and maintainability. Focused on building responsive, user-friendly interfaces while enhancing frontend development skills.

PROJECT EXPERIENCE

NeuraLang – AI Agent Programming Language

Developed NeuraLang, an AI-powered programming language designed to simplify software development using artificial intelligence. The project includes AI functions, memory management, asynchronous execution, multi-agent communication, LangChain/LLM integration, and a Visual Studio Code extension.

Full Stack E-Commerce Platform

Developed a full-stack E-Commerce web application using the MERN Stack. Implemented secure user authentication, role-based access control (RBAC), product management, shopping cart, order management, and an admin dashboard. Focused on building a responsive UI, RESTful APIs, and efficient database integration to provide a seamless shopping experience.

AI Restaurant Management System

Built an AI-powered Restaurant Management System to streamline restaurant operations. Implemented user authentication, dashboards, REST APIs, and database integration for managing orders and daily operations. The project improved my skills in full-stack development, API design, and scalable application architecture.

To-Do List Application

Developed a full-stack To-Do List application with user authentication and CRUD functionality. Users can create, update, delete, and manage their daily tasks securely. This project strengthened my understanding of authentication, database operations, and REST API development using the MERN Stack.
