CAREER OBJECTIVE

Seeking a challenging and responsible role in the electronics industry to develop as an Embedded Systems Engineer, apply technical knowledge, learn emerging technologies, and grow as a skilled professional.

TECHNICAL SKILLS

- **Programming:** Advanced C, C++, Data Structures, Shell Scripting
- **Embedded:** PIC16F877A, GPIO, Analog I/O, memory usage, LCD, timers, counters, interrupts
- **Protocols:** UART, SPI, I2C
- **Linux/System Programming:** Ubuntu, system calls, IPC (Pipe, FIFO, Shared Memory), TCP/UDP sockets, pthreads
- **Tools:** Vim, Makefiles, MPLAB; GCC, XC8

EDUCATION & TRAINING

- B.E. Electronics & Communication Engineering — Velalar College of Engineering and Technology (VCET), 71.20%, 2021–2025
- Advanced Embedded Systems Course — Emertxe Information Technologies, Bangalore; Government of India certified / Skill India aligned program
- Class XII — State Board, 81.81%, 2021 | Class X — State Board, 72.80%, 2019

PROJECTS

- **Image Steganography using LSB Encoding & Decoding —** Embedded C, file operations, pointers, bitwise operations, functions, Makefiles, command-line arguments.
- **Address Book Application in C —** Menu-driven contact management with persistent storage using structures, file handling, pointers and functions.
- **Inverted Search Project (DSA) —** Mapped words to files for fast text search using data structures, file handling, pointers and dynamic memory.
- **Car Black Box System —** PIC-based monitoring and logging of speed, time and event status using Embedded C, EEPROM, timers, LCD and I2C.
- **MP3-TagReader —** Advanced C project for displaying, modifying and deleting MP3 metadata using file operations, structures and pointers.
- **Lexical Analyzer —** Command-line C lexical analyzer identifying keywords, identifiers, operators, special characters and literals; handles // and /* */ comments.

ACADEMIC PROJECT

IoT-Based Fruit Decay and Chemical Contamination Detection System — IoT, sensors, microcontroller, Embedded C and wireless communication for real-time detection and monitoring.

ACHIEVEMENTS & CONTRIBUTIONS

- Completed hands-on training in Mobile Phone Servicing with practical hardware troubleshooting and repair.
- Received a Spot Award during Embedded Systems training for problem-solving skills in Data Structures and Algorithms.
- Recognised for strong problem-solving and C programming skills during embedded systems training.
