SUMMARY

Computer Science undergraduate building full-stack applications in Java and Python, with a focus on cloud-backed systems and signal-processing modules validated through national hackathons - Smart India Hackathon 2025 and AISE Hack 2026. Comfortable owning a module end-to-end, from design through testing, and shipping working prototypes under compressed timelines.

TECHNICAL SKILLS

Languages: Java, Python, Hyper Text Markup Language
Backend & Database: MySQL, Firebase Firestore
Tools: Git, GitHub, VS Code, Jupyter Notebook, Flutter
Core CS: OOP, DBMS, DSA

ACADEMIC PROJECTS

Cognitive Opportunistic LEO-PNT Receiver System *Smart India Hackathon 2025 (National Finalist)*

- Engineered the signal-processing module for a GNSS + opportunistic-signal fusion navigation system, improving positioning accuracy in signal-challenged test scenarios
- Collaborated within a 6-member team; module was evaluated as part of a nationally shortlisted proposal among many teams

Smart Livestock Management System (RFID + Cloud)

- Built the backend and cloud integration layer (Firebase Firestore) for an RFID-based livestock tracking system, enabling real-time data sync across simulated/test livestock records
- Designed role-based access control for 3 user types (owners, doctors, workers), reducing manual record lookup steps

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering
Kongunadu College of Engineering & Technology, Thottiyam, Tamil Nadu 2023 - 2027
CGPA: 8.338 / 10

Higher Secondary Certificate (Class XII)
Sowdaambikaa Matric Higher Secondary School, Thottiyam 2022 - 2023
86.83%

CERTIFICATIONS

- Python Full Stack Development, Infoem Software Solutions, Namakkal
- Java Programming, Yellowmatics
- Build Python Web Apps with Django and Flask, Explore IT Corp
- Transformative Python and Machine Learning Journey with a Hands-on Mini Project, Inspire Softech Solution

ACHIEVEMENTS

- Secured a position as a National Finalist in AISE Hack 2026, demonstrating innovation at a national-level hackathon
- Awarded Third Prize in the Intra-College AD Hackathon 2026 for developing an impactful project solution
- Selected as a National Finalist Team in Smart India Hackathon (SIH) 2025, one of India's premier innovation and product development competitions
- Won First Prize in the Intra-College AD Hackathon 2025, showcasing excellence collaborative problem-solving

EXTRACURRICULAR ACTIVITIES

- Joint Secretary, Computer Society of India (2026) organized technical events and workshops for students
- Volunteer, NSS (National Service Scheme) unit
- Presented “Advancements in Renewable Energy” at National Level Renewable Energy Day Celebration 2024
- Successfully participated in the Health Hackathon jointly organized by VIT Bhopal University, India and Johns Hopkins University, USA, collaborating on innovative healthcare solutions
