SUMMARY

Highly motivated B.E. Electronics and Communication Engineering graduate with a passion for learning and innovation. Eager to leverage academic knowledge and project experience to contribute to a challenging technical role while continuously growing professionally.

EDUCATION

2023 - 2027

BE Electronics and Communication Engineering

Kongunadu College of Engineering and Technology

CGPA : 7.96

SKILLS

Core Technical Skills:

- VLSI Design
- Embedded Systems
- IoT
- FPGA

PROGRAMMING LANGUAGES:

- C
- C++
- Java

Soft Skills :

- Problem Solving
- Leadership
- Adaptability
- Creativity
- Team Collaboration

Tools

- Modelsim
- Multisim
- Xilinx Vivado
- Visual Studio Code

PROJECTS

GSM-Based Transformer Fault Detection System

Tools Used: Arduino UNO, Flame Sensor, GSM Module, Buzzer, LCD Display

Description :

Designed a GSM-based Transformer Fault Detection System to detect short circuits, line cuts, and overloads. Integrated flame sensors with ESP32 to detect fires and activate buzzer alerts. Implemented real-time SMS notifications through a GSM module for fault monitoring.

RFID-Based Industry Monitoring System

Tools Used: RFID, ESP8266, Embedded C, IoT, LCD Display, Buzzer

Description :

Developed an RFID-based system to automate employee identification and access control using RFID technology and a microcontroller. The system authenticates RFID tags, displays employee details on an LCD, and triggers buzzer alerts for unauthorized access. It enhances industrial security, enables real-time personnel monitoring, and reduces manual effort through automated identification.

Real-Time Industrial Hazard Alert System

Tools Used: ESP32 , IoT, MQ-2 Gas Sensor, DHT11, Flame Sensor, Buzzer

Description :

Designed an IoT-based system for real-time detection of industrial hazards and unsafe conditions. Monitors gas leaks, temperature, smoke, and fire using environmental sensors. Sends instant alerts through buzzer, LED indicators, and mobile notifications. Enhances workplace safety by enabling quick emergency response and accident prevention.

INTERNSHIP

E2INFOSYSTEMS - CHENNAI **15 June 2025 – 15 July 2025**

Role - Web Development Intern

- Learned and applied front-end web development concepts using HTML, CSS, and JavaScript.
- Developed responsive web pages and user interface components following modern web design practices.
- Worked on mini-projects to improve website functionality and user experience.
- Performed debugging, testing, and optimization of web applications.
