SUMMARY

Full Stack Developer with strong Data Structures & Algorithms and CS fundamentals, and hands-on industry experience building and shipping production web platforms (MERN, Node.js/Express, React, REST APIs) with cloud deployment and CI/CD. Seeking to apply strong problem-solving skills and full-stack engineering experience in the Google Apprenticeship Program.

EDUCATION

Sri Shanmugha College of Engineering and Technology *2023 – 2027*
B.Tech, Artificial Intelligence & Data Science — CGPA: 8.65 / 10.0

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, PHP
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering
Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS
Backend & APIs: Node.js, Express.js, Laravel, RESTful APIs, JWT, Microservices
Databases: MySQL, PostgreSQL, MongoDB, Supabase
Cloud & DevOps: AWS, Docker, Linux, CI/CD, Git/GitHub
Other: TensorFlow, Keras, OpenCV, Prompt Engineering, Agile/Scrum

EXPERIENCE

Full Stack Developer Intern — FinTechGie *May 2024 – Feb 2026*

- Built and launched a Laravel-based business-school platform (youngchanakya.com) handling event management, Razorpay payments, auth, and a custom CMS for 5+ user roles.
- Designed and integrated RESTful APIs across 3+ client projects, standardizing request/response contracts to speed up frontend-backend integration.
- Optimized MySQL queries and backend architecture to scale the platform beyond 100 concurrent events/courses; containerized apps with Docker for zero-downtime deploys.

Software Developer Intern — Aakam360 *Feb 2026 – Apr 2026*

- Architected a MERN-stack event registration platform with JWT-secured APIs, increasing user registrations by 25% through streamlined onboarding.
- Resolved 15+ critical QA issues pre-launch, reducing post-launch defects to near zero and saving 2+ weeks of hotfix effort.

PROJECTS

Nilam One Ventures — Real Estate Marketplace | *Next.js, Supabase, RAG Chatbot*

- Built a production real-estate marketplace with buyer/seller/admin portals, multi-criteria search, and PostgreSQL-backed real-time listings via Supabase.
- Integrated a RAG chatbot that answers buyer queries in natural language using live property data for price, location, and availability.

Class Leave Hub — Cross-Platform Mobile Application | *React Native, Node.js, Express,Firebase*

- Built a cross-platform React Native app serving **1,000+ active users** across Student, Teacher, HOD, and Admin roles.
- Engineered an automated multi-step leave approval engine with role-based routing and instant event-driven push notifications.
- Integrated secure JWT session management and real-time state synchronization for live attendance tracking and analytics.

HRMS — Human Resource Management System | *React, Node.js, Express, MySQL*

- Architected an 11-module HRMS (onboarding, attendance, payroll, leave, tasks) with JWT auth and four-tier role-based access control.
- Designed a normalized MySQL schema supporting complex reporting across all modules for 100+ simulated employees.

E-Commerce Platform *MERN Stack · JWT · Real-Time Analytics*

- Shipped a full-stack e-commerce app supporting 10,000+ daily users with a real-time analytics dashboard; optimized MongoDB aggregation pipelines for live data at scale.

ACHIEVEMENTS

- 🥇 1st Prize, GenAI Hackathon (Cerebrate '24) — built the top-rated generative AI solution among all teams.
- 🥉 3rd Place, Shanmugha Code Hunt 2025 (Code Debugging) — top placement solving complex bugs under time pressure.
- Shipped 10+ web applications (Laravel, MERN, Next.js, WordPress) and independently launched 2 live production platforms as a 2nd-year student.
