SAMEERA FAZILATH

Aspiring Data Analyst

+91 8056932506 | Sameerafazilath2006@gmail.com | Erode District, Tamil Nadu | LinkedIn | GitHub

CAREER OBJECTIVE

B.Sc Computer Science graduate with knowledge of Excel, SQL, Power BI, and data analysis. Skilled in data cleaning, dashboard development, data visualization, and generating business insights. Seeking an entry-level Data Analyst position to apply analytical and problem-solving skills in a professional environment.

EDUCATION

B.Sc. Computer Science 2024 – Present

Periyar University, Salem

TECHNICAL SKILLS

Microsoft Excel: Pivot Tables, XLOOKUP, Power Query, Data Cleaning

SQL: Queries, SELECT, WHERE, GROUP BY, JOIN, Aggregate Functions

Power BI: Data Modeling, Power Query, DAX, Dashboard Development, Data Visualization

Python: Basic Python, Pandas, Data Analysis

Data Analytics: Data Cleaning, Data Validation, Trend Analysis, Business Reporting

Soft Skills: Analytical Thinking, Problem Solving, Communication

CERTIFICATIONS

Certification in AI-Driven Data Analytics Nov 2025 – May 2026

Entri Elevate – Illinois Tech (USA) – NSDC

- Completed an industry-aligned program covering the full data analytics lifecycle — from data ingestion and cleaning to modeling, visualization, and business insight delivery.
- Gained hands-on training in Excel, Power BI, MySQL, and Python (Pandas, NumPy, Matplotlib, Seaborn) within Anaconda & Jupyter.
- Applied DAX to build calculated measures and time-intelligence functions for Power BI data models.
- Executed capstone projects simulating real-world analytics workflows and presenting dashboards to stakeholders.

PROJECTS

College Placement Analysis Dashboard – Power BI

- Cleaned and transformed placement data using Power Query.
- Created interactive Power BI dashboards to analyze placement trends.
- Used DAX measures to calculate placement percentage, average package and other KPIs.
- Analyzed placement data based on department, company, salary and academic performance.
- Presented insights through charts, cards and interactive visualizations.

Student Sleep Health Analysis using Excel & Power BI | *GitHub*

- Executed an end-to-end analytics workflow: raw data ingestion, cleaning, transformation, modeling, and Power BI dashboard delivery.
- Built DAX-powered Power BI reports correlating sleep duration with exam performance and health metrics across 500+ student records.
- Delivered a stakeholder-ready interactive dashboard enabling drill-down exploration of sleep, stress, and academic performance indicators.
- Applied KPI cards and conditional formatting to highlight at-risk students for academic counselors and health advisors.

Student Performance Analysis using Python & Power BI | *GitHub*

- Performed data cleaning, preprocessing, and EDA with Pandas and NumPy on 1,000+ student records; handled missing values, outliers, and feature engineering.
- Visualized subject-wise performance, attendance impact, and score distributions using Matplotlib and Seaborn (heatmaps, box plots, histograms).
- Built Power BI dashboards to identify performance trends and at-risk learner segments with dynamic filtering by subject, attendance, and demographics.
- Generated evidence-based recommendations for academic improvement, translating insights into actionable narratives for non-technical stakeholders.
