PROFESSIONAL SUMMARY

Computer Science and Engineering student with knowledge of full-stack web development, Java, React.js, MongoDB, SQL, and AI/LLM technologies. Hands-on experience through UI/UX and AI/LLM internships, academic projects, and hackathons. Familiar with LLMs, NLP, RAG, AI agents, Git, and GitHub. Seeking an entry-level software development or full-stack development opportunity.

TECHNICAL SKILLS

Programming Languages: Java, Python

Web Development: HTML, CSS, JavaScript, React.js, Full-Stack Web Development

Databases: MongoDB, SQL

AI and LLM: Large Language Models (LLMs), NLP, Sentiment Analysis, Gemini, LangChain, RAG, CrewAI, LangGraph, Agentic RAG

Tools and Platforms: Git, GitHub, VS code, Antigravity

INTERNSHIP EXPERIENCE

AI & LLM Intern — CDW | Feb 2026

- Gained hands-on experience in Python programming, Natural Language Processing (NLP), and sentiment analysis.
- Worked with Large Language Models (LLMs), Gemini, LangChain, and Retrieval Augmented Generation (RAG) to build AI-powered applications.
- Developed AI agents using CrewAI and LangGraph and explored Agentic RAG architectures for intelligent task automation.

UI/UX Design Intern — Futogen | Jun 2025

- Designed user-friendly web and mobile application interfaces using UI/UX design principles.
- Created wireframes, prototypes, and user flows to improve user experience and application usability.
- Collaborated with development teams to transform design concepts into functional and responsive interfaces.

PROJECTS

Web-Based Smart City Complaint Monitoring and Resolution System

Developed a web application that allows citizens to register complaints about public issues such as potholes, garbage, and streetlight failures. Implemented complaint tracking and automatic escalation of unresolved complaints to higher authorities, improving transparency and issue resolution.

Smart Accident Alert System Using GPS and GSM

Developed a system that detects vehicle accidents using sensors and automatically sends the accident location to emergency contacts through GPS and GSM modules. Designed to reduce emergency response time and improve road safety.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering | 2023–2027

Kongunadu College of Engineering and Technology | CGPA: 7.35/10

Higher Secondary Certificate (HSC) | 2023

Kamarajar Higher Secondary School | Percentage: 77%

CERTIFICATIONS

- Java Programming — Yellomatics
- MongoDB Basics — MongoDB
- MERN Stack Development — Error Makes Clever (ISO)

- Cyber Security — Xplore Intellects

ACHIEVEMENTS

- National-Level Finalist — AISE Hack 2026
- National-Level Finalist — GUVI HCL Hackathon 2025

ADDITIONAL INFORMATION

Languages: English, Tamil

Interests: Web Designing, Problem Solving
