SUMMARY

Enthusiastic CSE student with a strong foundation in programming and web development. Skilled in applying technical knowledge to practical projects, with strong communication, teamwork, and problem-solving abilities. Seeking an opportunity to contribute to organizational success while learning new technologies and growing professionally.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering **Sep 2023 - May 2027**

Kongunadu College of Engineering and Technology

- CGPA: 8.639

Higher Secondary **May 2023**

Sowdambikaa Matric Higher Secondary School

- Percentage: 89.3%

High School **Mar 2021**

Sowdambikaa Matric Higher Secondary School

- Percentage: 100%

SKILLS

Technical Skills

- Java, HTML, CSS, ReactJS, Flask, SQL

Soft Skills

- Communication, Team Building, Leadership, Problem Solving

PROJECT EXPERIENCE

AgriVision – Smart Agriculture Support System

- Developed an AI-based agriculture platform supporting crop recommendation, disease detection, and profit prediction for data-driven farming.
- Designed and developed a user-friendly interface with responsive layouts, smooth navigation, and interactive features.
- Technologies Used: Python, Flask, TensorFlow, OpenCV, Scikit-learn, HTML, CSS, JavaScript, Bootstrap, MySQL, Git.

AI-Based Deforestation Detection Using Satellite Imagery

- Developed an AI-based system to analyze satellite images and identify vegetation changes over time for accurate deforestation monitoring.
- Designed the frontend interface and implemented the backend flow to process uploaded satellite images through the AI model and display detection results.
- Technologies Used: Python, TensorFlow, OpenCV, Scikit-learn, Flask, HTML, CSS, JavaScript, Google Colab, Git.

AI-Based Acoustic Fall Detection System

- Developed an AI-based acoustic monitoring system to detect human falls by analyzing sound patterns and providing real-time alerts.
- Integrated the AI model with the application to classify audio patterns and identify potential falls for timely emergency response.
- Technologies Used: Python, TensorFlow, Librosa, NumPy, Scikit-learn, Flask, HTML, CSS, JavaScript, Google Colab, Git.

INTERNSHIP EXPERIENCE

Astonish Infotech

Assisted in developing full stack web applications at Astonish Infotech by working on both front-end and back-end tasks. Designed responsive web pages using HTML, CSS, and JavaScript, and improved UI/UX by creating clean and user-friendly layouts. Also supported backend integration and assisted in connecting frontend components with backend services.

HACKATHON EXPERIENCE

HACK 0XDAY Edition 1 HACKATHON

Organized by Pivot and 0xDay in collaboration with Sri Manakula Vinayagar Engineering College.

Smart India Hackathon

Participated in Level 1 (Internal Round) of the Smart India Hackathon in 2024 and 2025, working with a team to develop solutions for real-world problem statements and improving my problem- solving and teamwork skills.

CERTIFICATIONS

- JLPT N5 Completed
- Software Testing - NPTEL
- Data Analytics with Python - NPTEL
- Prompt Engineering - Infosys Springboard
- Principles of Generative AI - Infosys Springboard
- Value Added Course - Java
- Value Added Course - Python with Django and Flask

HOBBIES

- Traveling
- Gardening
- Learning New Things
