About Me

Passionate Computer Science Engineering student with a strong interest in Full Stack Development, and software development. Skilled in Java, HTML, CSS, and JavaScript, with hands-on experience in developing real-world projects. Eager to learn new technologies and contribute innovative solutions in a professional environment.

Education

Bachelor of Engineering 2023-2027
Kongunadu College of Engineering and Technology CGPA:7.5

Higher Secondary Certificate 2023-80%
Annai Meenatchi Nachiar Hr.Sec.School

Technical Skills

- Web Development
- Database Management
- Object Oriented Programming(OOPs)

Programming Languages

- Java
- MongoDB, SQL
- HTML CSS Javascript
- React js

Personal Details

- **Language Known:** English,Tamil
- **Hobbies:** Fitness & Strength Training

Experience

Graphic Design Intern (Jun-2025)

Nimatooz Smile Mobility Pvt Ltd

- Designed professional brochures, posters, banners, and promotional materials for marketing campaigns.
- Created visually appealing digital designs while maintaining brand consistency and design standards.
- Collaborated with the team to deliver high-quality creative assets within project deadlines.

Web Development Intern (Dec 2023)

System Tron

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Implemented user-friendly UI components and responsive website layouts.
- Tested, debugged, and optimized web pages while collaborating with mentors to complete assigned tasks.

Projects

Prediction of Diabetes Type 1 and Type 2

- Developed a machine learning based web application to predict Type 1, Type 2, or Non-Diabetes using medical parameters such as Glucose, HbA1c, BMI, Cholesterol, and Insulin.
- Implemented OCR-based report analysis to automatically extract values from blood test reports, reducing manual data entry and evaluated a Random Forest Classifier using Python.

Smart Finance Management System

- Developed a personal finance tracking system for managing income and expenses with automated balance calculation.
- Designed a dashboard to generate financial summaries and expense analysis reports.
- Planned SMS-based transaction detection for automated expense tracking (future enhancement).

Government Scheme Chatbot

- Developed an AI-powered chatbot using Flask, HTML, CSS, and JavaScript to provide information on government welfare schemes.
- Implemented scheme recommendation and eligibility checking based on user queries for quick and accurate assistance.
- Integrated a user-friendly interface with multilingual support to improve accessibility and enhance the overall user experience.

Certification

- Managed to Won First Prize in the Intra-College Technical Event conducted by the Department of Artificial Intelligence and Data Science (AI & DS) for presenting an innovative technical idea.
- Actively participated in multiple national-level hackathons, including the ANRF Hackathon conducted by IIIT Hyderabad.
