DEEPIKA C

AI Engineer

B.Tech – Artificial Intelligence & Data Science

NAMAKKAL | +91 9677613304 | deepikachinnadurai2006@gmail.com | linkedin.com/in/deepika-chinnadurai

PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence & Data Science student with hands-on experience building AI/ML solutions in Python, including Generative AI , NLP, and REST API integration. Skilled in data preprocessing, model training/evaluation, Strong in DSA, problem-solving, and debugging, with a track record of delivering AI applications at 95%+ accuracy across academic and internship projects.

TECHNICAL SKILLS

Programming: Python, Java, HTML, CSS
AI / ML / GenAI: Machine Learning, Deep Learning, NLP, LLMs, RAG, Prompt Engineering
Libraries & APIs: Pandas, NumPy, REST APIs
Databases: MySQL, SQL, MongoDB
Tools: Google Colab, Jupyter Notebook, VS Code

EDUCATION

Degree	Institute / Board	CGPA / %	Year
B.Tech (AI & DS)	Kongunadu College of Engineering and Technology	8.31 CGPA	2023 – 2027
HSC	Bharathi Hr Sec School	85.33%	2022 – 2023

WORK EXPERIENCE

AI/ML Intern | Infoem Software Solutions

- Applied Python and Machine Learning techniques to practical software development tasks, contributing to AI-based application features.
- Performed end-to-end data preprocessing, dataset preparation, model implementation, and performance evaluation for ML pipelines.
- Gained hands-on exposure to the full machine learning development lifecycle, from data cleaning to model deployment readiness.

Frontend Development Intern | Ideal Formatic Group of Companies

- Built responsive, user-friendly web interfaces using HTML and CSS, translating requirements into functional UI components.
- Implemented page structures, styling, and reusable UI components aligned with project specifications.
- Collaborated with the development team to improve website usability and overall user experience.

PROJECTS

AI Voice-Based Virtual Assistant | Python, NLP, Speech Recognition, REST APIs, gTTS

- Built an end-to-end voice assistant handling command processing, query handling, web search, weather updates, reminders, application control, and media playback.
- Achieved 95.8% command recognition accuracy through iterative NLP model tuning and evaluation.
- Integrated third-party REST APIs to retrieve and process real-time information based on user voice commands.

Explainable AI Translator | Python, NLP, Google Translate API, WordNet, gTTS

- Developed a translation tool combining text preprocessing, language translation, word-level explanations, API integration, and audio pronunciation output.
- Applied explainable AI (XAI) techniques to improve translation interpretability and user trust.
- Achieved 96.4% translation accuracy during project evaluation.

CERTIFICATIONS

- Introduction to Internet of Things (IoT) — NPTEL
- Cloud Computing — NPTEL

ADDITIONAL TRAINING

- Java Programming (HackerRank & LeetCode — DSA practice); Machine Learning & Deep Learning (Google Colab).

ACHIEVEMENTS & AWARDS

- **Third Prize Winner —** Intra-Level College Hackathon organized by the ECE Department, Kongunadu College of Engineering and Technology.
- **Participant —** Paper presentations at Kongu College of Engineering & Karpagam College of Technology; hackathons at VIT-Chennai & New Prince Shri Bhavani College of Engineering and Technology, technical workshop at KSR Engineering College.
