SRIRAM N

Graphic Designer & Full stack enthusiast

Thanjavur - 614626 | sriram06125@gmail.com | +91 91598 42683

SUMMARY

Creative and detail-oriented Graphic Designer with hands-on expertise in poster design, brochure design, and UI/UX. Passionate about transforming ideas into visually compelling designs that communicate effectively and leave a lasting impression. Combines strong aesthetic sensibility with a solid understanding of front-end technologies to deliver user-centered digital and print experiences. Driven by a commitment to crafting designs that are not only visually impactful but also aligned with real-world brand and business goals.

TECHNICAL SKILLS

- Canva
- Adobe
- Java
- Python
- HTML, CSS (Response Web Design)
- Linux Basics

INTERNSHIP EXPERIENCE

June 2025 , 15 days

Internship Training , CYBER SECURITY

DLK software solution PVT. Ltd

- Completed hands-on internship in Cyber Security with practical exposure to core concepts.
- Gained knowledge of cyber threats, vulnerabilities, and security mechanisms.
- Worked on real-world security scenarios to strengthen problem-solving skills.
- Developed adaptability and quick learning through practical exercises.
- Built a strong foundation via **hands-on labs and guided training sessions**.

PROJECTS

(SIH - 2024) Finalist – AI-Powered Cryptanalysis System.

- Built an AI/ML system to detect **30+ encryption algorithms** from ciphertext.
- Extracted features using **byte-frequency and entropy analysis**.
- Trained a **Random Forest classifier** for multi-class algorithm detection.
- Created synthetic data with PyCryptodome and built an **end-to-end ML pipeline**.

(SIH - 2025) Fixitizen - Smart Grievance Redressal and Civic Management System

- Developed FIXITIZEN, a civic grievance platform to improve citizen–authority communication.
- Implemented OTP-based complaint filing and AI-assisted verification for secure reporting.
- Enabled multilingual chatbot support to enhance accessibility and inclusivity.
- Integrated real-time tracking, GPS tagging, and role-based dashboards for transparency and efficient governance.

MSME 3.0 Project – Ayurvedic Leaf Grading System

- Worked on an MSME 3.0 (Government of India) project to develop an Ayurvedic leaf grading system.
- Built Python-based ML models for image analysis and leaf classification.
- Integrated a Raspberry Pi for real-time processing and system control.
- Achieved accurate grading based on quality parameters, delivering the project **within timeline**.

EDUCATION

B. Tech in Information Technology — **Aug 2023 – Apr 2027**
Kongunadu College of Engineering and Technology

Higher Secondary — **Apr 2023**
Arunodhaya Higher secondary School

High School — **May 2021**
Arunodhaya Higher secondary School
