MOKESH S

SOC ANALYST | BLUE TEAM | SIEM MONITORING

Salem, Tamil Nadu • +91 8098073447 • smokeshselvam@gmail.com • linkedin.com/in/mokesh-s • github.com/Mokesh-2214

SUMMARY

Cybersecurity undergraduate focused on SOC and blue-team operations, with hands-on Wazuh SIEM experience across centralized log collection, custom decoders, PCRE2 rules, alert validation, and troubleshooting. Exposure to Sophos EDR, vulnerability assessment, network monitoring, IAM, AWS, and Bash. Built and tested detections for DNS, DHCP, proxy, and VPN security telemetry in a lab environment.

CORE SKILLS

- SIEM / SOC: Wazuh, log analysis, alert triage, detection engineering, wazuh-logtest, alerts.json, Wazuh Dashboard
- Detection & Network Security: PCRE2, custom decoders, custom rules, DNS, DHCP, proxy, VPN logs, network traffic monitoring, intrusion detection
- Security Tools: Sophos EDR, Nmap, Burp Suite, ManageEngine, Duo MFA, AWS
- Systems & Scripting: Linux, Windows, Bash scripting, GitHub, networking fundamentals
- IAM & Cloud: Identity and Access Management (IAM), Role-Based Access Control (RBAC), AWS cloud security

CYBERSECURITY PROJECT

Wazuh SIEM Lab | Security Monitoring

- Built a centralized Wazuh monitoring lab using Wazuh Agents and Manager to collect and analyze Linux and application security logs.
- Integrated BIND9 DNS, dnsmasq DHCP, Squid Proxy, and OpenVPN telemetry using custom log collection, decoders, and detection rules.
- Developed PCRE2-based Wazuh decoders and custom rules to identify DNS queries, DHCP activity, suspicious events, and network/security log patterns.
- Validated detections with wazuh-logtest and confirmed live alerts in alerts.json and the Wazuh Dashboard; troubleshot agent, log, decoder, and rule issues.

Target Port Scanner | Solo Project

- Built a network port scanner to identify open ports and exposed services on target hosts, supporting reconnaissance during vulnerability assessment.

EXPERIENCE

Software Development Intern | Infoziant | 6 Months | Remote

- Delivered two full-stack web applications independently, taking assigned projects from architecture through deployment.
- Developed React.js frontends and Node.js/Express.js backend services with MongoDB and full CRUD functionality.
- Implemented RBAC, JWT authentication, and Google OAuth to control and secure application access.
- Handled API integration, authorization logic, debugging, and end-to-end delivery independently.

CYBERSECURITY TRAINING

Cybersecurity Training Program | NERDS Lab

- Completed hands-on training in SIEM monitoring, network traffic analysis, and vulnerability assessment using Wazuh, Sophos EDR, and Burp Suite.
- Practiced simulated endpoint security scenarios involving suspicious-activity detection, alert triage, and security finding documentation.

EDUCATION

B.E. Computer Science and Engineering (Cybersecurity) | Sri Shanmugha College of Engineering and Technology | Expected 2027
Salem, Tamil Nadu | 4th Year | CGPA: 8.25

CTF & CYBERSECURITY COMMUNITY

SOC Warriors — Hack The Box CTF Team

- Created and organized a CTF team focused on hands-on cybersecurity problem solving and collaborative learning.
- Practice challenges across Web Security, Digital Forensics, Cryptography, Networking, OSINT, Linux/Windows Security, and Vulnerability Assessment & Exploitation.

CERTIFICATIONS

- Ethical Hacking | PrepInsta Technologies | August 2026
- Operating Systems (OS) | PrepInsta Technologies | November 2024
- NCC 'A' & 'B' Certificate | National Cadet Corps

TARGET ROLES

SOC Analyst • Security Operations • Blue Team • MSS • SIEM Monitoring • IAM • Cloud Security
