https://www.linkedin.com/in/sabarinathan-g-s

## OBJECTIVE

Motivated ECE graduate with academic and project experience in VLSI design and embedded systems. Strong grasp of digital electronics, microcontroller programming, and hardware-software integration. Eager to apply skills to solve real-world engineering challenges in a growth-oriented organization.

## EDUCATION

- **KSR Institute For Engineering And Technology | Thiruchengodu, Namakkal ,Tamilnadu, India** 2023- 2027
  B.E.Electronics And Communication Engineering
  Current CGPA : 8.14 %
- **Amala Matric Higher Seconday School. | Gobichettipalayam,Erode,Tamilnadu,India** 2022 -2023
  HSLC Results : 82%
- **Amala Matric Higher Seconday School .** 2021-2022
  SSLC Result : pass

## TECHNICAL SKILLS

- Programming : C,Java (Basics)
- VLSI Design : Verilog , System Verilog
- Embedded &IOT : Sensor Interfacing , Microcontroller (Arduino ,Esp32 )
- Design & Simulation / Interfacing Tools:Xilinx, Vivado, EDA Playground, Wokwi, Tinkercad

## PROJECTS

- **SMART IRRIGATION SYSTEM (in IOT)**
  - the project was implemented by using iot hardwares and interfacing iot softwares to overcome the causes and major problem held in agricultural lands and fields.
- **VEHICLE NUMBER PLATE DETECTION**
  - using ESP32-CAM Developed a real-time ANPR system using ESP32-CAM and OV3660 sensor to capture, process, and transmit vehicle images to a cloud server for license plate recognition.
- **CODE CONVERTER CIRCUIT in VLSI(using VERILOG)**
  - The implementation of this project was included with the core concepts of digital electronics ,where it deals with the conversion technique of the code.

## CERTIFICATIONS

- **VALUE ADDED COURSE:**
  • **Embedded and IOT (Arduino UNO)-** gained practical experience in sensor interfacing, microcontroller programming, and IoT-based application development.
  • **VLSI DESIGN Course** - acquiring hands-on knowledge of Verilog/SystemVerilog, digital circuit design, simulation, and FPGA design tools such as Xilinx and Vivado.
- **NPTEL** • Internet Of Things (Elite)-Successfully completed the NPTEL Internet of Things (Elite) certification, gaining a strong understanding of IoT architecture, communication protocols, sensors, and cloud-based IoT systems.

## INTERNSHIP

- **Internship : Java**
  •Completed Internship training on "Livestream Technologies" ,Coimbatore .And Learned basics
- **Course : VLSI DESIGN**
  • inplant training on "taarus Consultancy prvt ltd "
  • learned Basics of Verilog And System Verilog

## SKILLS

- •Strong interest in learning of VLSI & Embedded (IOT)
  • Quick learner with practical problem-solving approach
  • Ability to work in team environment
