CARRIER OBJECTIVE

I am an Electronics and Communication Engineering student with knowledge in IoT and Java Programming and passionate about building innovative solutions and constantly improving my technical skills through hands-on learning.

EDUCATION

KONGUNADU COLLEGE OF ENGINEERING AND TECHONOLOGY **2023-2027**

Department of electronics and communication engineering

CGPA : 8.54

SRI VIDHYA MANDIR MATRIC HR.SEC. SCHOOL

HSC **2022-2023**

PERCENTAGE:85%

PROJECTS

IOT BASED-INVISIBLE LOCK WITH VOICE AND VIBRATION AUTHENTICATION

- Developed an IoT-based smart locking system using voice and vibration authentication that Implemented dual-layer security to prevent unauthorized access.
- Enabled real-time lock control and user authentication by using ESP32, GSM Module, Servo Motor, Voice Recognition Module, Vibration Sensor.

NETWORK BASED-ROAD DAMAGE DETECTION AND ALERT SYSTEM

- Developed a software-based system to identify road damages and generate real-time alerts that Processed and analyzed road condition data to improve detection accuracy.
- Enabled timely notifications for better road maintenance and safety by using Java program , cloud Database and software development.

TECHNICAL SKILLS

- Java programmig
- IOT
- Collections(Basics)

SOFT SKILLS

- Leadership
- Team work
- Adaptability

LANGUAGES

- English
- Japanese(Basics) N5

INTERNSHIP

Green SoftGroups **Durations : 15 Days**

Applied core Java programming concepts by developing basic applications and performing debugging. Enhanced problem-solving, teamwork, and technical skills through hands-on practice.

ACHIVEMENTS

- Actively involved in teamwork and collaborative activities.
- Member of Indian Society for Technical Education (ISTE).
- Selected at the college level for Smart India Hackathon 2025.
- Actively participated in multiple paper presentations and hackathons.
- NPTEL certification on Introduction to Industry 4.0 and Internet of Things Value added Course.
