PROFESSIONAL SUMMARY

Detail-oriented Data Analyst graduate with a B.Tech in Artificial Intelligence and Data Science. Experience in data cleaning, preprocessing, tagging, and basic data analysis using Python, SQL, and Excel. Strong analytical mindset with ability to manage multiple processes in parallel and coordinate effectively with remote teams.

EDUCATION

B.Tech – Artificial Intelligence & Data Science, Sona College of Technology (2025) | CGPA: 7.0

Diploma – Electronics & Communication Engineering, Muthayammal Polytechnic College (2019–2022) | 90%

TECHNICAL SKILLS

- Python (Pandas, NumPy, Regex, Data Cleaning)
- SQL (Joins, Aggregations, Filtering, Basic Queries)
- Microsoft Excel (Pivot Tables, VLOOKUP, Data Validation)
- Azure (Basics)
- Machine Learning Fundamentals
- Strong Written & Verbal Communication Skills

PROJECT EXPERIENCE

Visual Media Restoration using ESRGAN

- Performed image dataset cleaning and preprocessing before model training.
- Validated data quality and reduced noise inconsistencies.
- Improved image resolution accuracy using AI-based techniques.

Assessment Application using Hugging Face Transformers

- Structured and cleaned text datasets for NLP model training.
- Applied Regex for pattern extraction and preprocessing tasks.
- Conducted validation checks and error analysis to improve output accuracy.

INTERNSHIP EXPERIENCE

Python Programming Intern – MotionCut (AICTE)

- Worked on structured datasets for cleaning and transformation.
- Developed Python scripts to automate data validation processes.
- Managed multiple assigned tasks in parallel while meeting deadlines.

CERTIFICATIONS

- Google Cybersecurity – Coursera
- SQL Analytics on Databricks
- Artificial Intelligence Primer – Infosys
- Internet of Things – NPTEL
