EDUCATION

- B.E - Biomedical Engineering | Sona College Of Technology| CGPA : 7.5 - Upto 7th semester
- HSC | Tagore Matric Hr Sec School 72% - 2022-2023
- SSLC | SRV Matric Hr Sec School - 2020-2021

SKILLS

- CalibrationAnd Testing Of The Medial Devices
- Application and Troubleshooting Of The Medical Devices
- Preventive and Corrective Maintenance
- Medical Device Handling

AREA OF INTEREST

- Medical Device Design
- Radiology Equipment
- Diagnostic And Therapeutic Equipment
- Wearable Healthcare technology
- Medical Image Processing

CO CURRICULAR AND EXTRA CURRICULAR

- AsAPart Of An Organizer, IOrganized An Intra & Inter-Symposium
- 1st-Prize Paper Presentation At Paavai College On Symposium
- NSS-Special Camp
- Participated On Dharan & Sona Marathon
- Volunteered As First Responder for Kauvery Marathon

PROFILE

Toexcel asa Biomedical Engineer by leveraging my expertise in medical device maintenance, calibration, troubleshooting, and technical support to maximize equipment reliability, ensure operational efficiency, anddeliver high-quality healthcare solutions

PROJECT

MEDICINEREMAINDER USING ARDUINO UNO - COMPLETED

lit Helps patients avoid missed doses by using an RTC module to trigger timed buzzer/LCD alerts, useful for elderly and chronic care. Smart Auricular Stimulation for Diabetes

SMART AURICULAR STIMULATION FOR DAIBETES USING CONDUCTIVE FABRICS - COMPLETED

A wearable e-textile device that delivers non-invasive TENS stimulation to ear acupoints via ESP32, supporting glycaemic control without insulin's cost or invasiveness.

DOG REPELLENT FOR PEACEFUL MOBILITY - COMPLETED

A portable ultrasonic device that detects motion and emits a harmless deterrent sound, improving safety for pedestrians and cyclists against stray dogs.

WOUND HEALING PREDICTOR- COMPLETED

Uses ultrasound imaging and signal processing to non-invasively measure wound depth and detect foreign bodies, aiding wound monitoring and recovery.

HERBAL BIO-RESPONSIVE LIQUID - ONGOING PROJECT

A herbal dip liquid that changes color to screen for nail infections (pH-based) and thyroid imbalances (redox-based), enabling low-cost, instrument-free home diagnostics.

LEAFLITE BIODEGRADABLE SHEET MATERIAL - ONGOING STARTUP PROJECT

A biodegradable packaging material made from corn starch and banana leaf fiber, offeringacompostablealternative to single-use plastics.

INTERNSHIP

PRIYAM&DR.THIRU NEUROSPECIALITY HOSPITAL,SALEM

I Have Gained hands-on training in hospital environments with exposure to various clinical departments and medical equipment. Developed practical knowledge of equipment operation, patient monitoring, and basic troubleshooting while coordinating effectively with healthcare professionals to support safe and reliable medical equipment performance

BPL MDICAL TECHNOLOGY,BANGLORE

I Gained in-depth practical exposure to medical device calibration, troubleshooting, maintenance, applications, and internal components, along with an understanding of the manufacturing workflow from assembly and sub-assembly to testing, quality inspection, packaging, and distribution to dealers, providing insight into the complete journeyofa medical device from manufacturing to the end user.

CERTIFICATION

- NPTEL-Design Thinking
- Embedded For Medical System - Training
- Calibration Of Medical Device Equipment - Workshop
- Live!QC - Workshop
- Japanese Proficiency Test - N5
