## Work Experience

### Internship Trainee

Narayana institute of Cardiac Sciences, Bangalore, India
*May 2025 - August 2025*

Completed a Biomedical Engineering internship at Narayana Health, focusing on equipment maintenance and calibration. Managed critical technical support and medical device monitoring within the high-acuity Pediatric Intensive Care Unit (PITU).

### Internship Trainee

During my clinical rotations at Deepam Hospital, Chennai. Vims Hospital, Salem and Surakksha Hospital, I gained extensive hands-on experience in the maintenance, troubleshooting, and calibration of diverse biomedical equipment. These roles required me to work closely with clinical staff to ensure the operational integrity of medical devices, consistently meeting hospital safety protocols and high-acuity care standards across multiple specialized departments.

## Education

### International Mobility Exchange Semester

*Universiti Malaya (UM), Kuala Lumpur, Malaysia*
*March 2026 - July 2026*

### Bachelor in Engineering

*Karpagam University, Tamilnadu, India*
Sep 2022 - Apr 2026

## Achievements

### Technical Innovation

Developed a **"Smart Glass"** prototype for the visually impaired that utilizes AI for object, face, and text recognition to provide navigation assistance via voice commands.

**Implemented New Accounting System (2021)**: Led to a 30%

## Skills

### Technical Skills

- Medical Equipment Maintenance
- Basic Python
- Basic C Programming
- Deep Learning
- Microsoft Excel

### Soft skills

- Analytical Proficiency
- Team Collaboration
- Quick Learner

## Languages

- English: Advanced
- Tamil: Proficient

## Hobbies

- Volunteer Projects
- Quick Learner
- Skill Development
