THAILA SRI R

CAREER OBJECTIVE

Final year IT student with hands-on experience in building academic projects. A quick learner with good communication skills, strong problem-solving ability, and a keen interest in exploring new technologies and applying concepts to real-world scenarios.

EDUCATION

B.TECH INFORMATION TECHNOLOGY,
KONGUNADU COLLEGE OF ENGINEERING AND TECHNOLOGY

2023 - 2027

CGPA - **8.16**

HIGHER SECONDARY,
LAKSHMI MATRICULATION HIGHER SECONDARY SCHOOL

2021 - 2023

PERCENTAGE - 83.1%

SSLC, LAKSHMI MATRICULATION HIGHER SECONDARY SCHOOL

2017 - 2021

INTERNSHIPS

Full Stack Development – **Astonish Info Tech** | June 2025

- Learned full stack development fundamentals and built responsive web applications using **HTML, CSS, JavaScript**
- Developed **client-server integrated dynamic web projects** with hands-on coding experience strengthened **problem-solving skills** by working on end-toend **practical project modules**

EXTRA CURRICULAR ACTIVITIES

- Secured **3rd Prize** in National Level Hackathon at **Dhanalakshmi Srinivasan University** for "**Laser Based Non-Invasive Blood Glucose Monitoring System".**
- Presented technical papers at inter-college symposiums and conferences.
- Published research paper on **Smart Battery Monitoring System** for **EV Two-Wheelers**
- Actively participated in technical workshops and seminars on IoT, AI, and Cyber Security.
- Active member of **College Technical Club** and coordinated department events.

Personal Details

10/63, South Lakshmi Puram Virali-malai Road
MANAPARAI, 621 306
TAMIL NADU

SKILLS

Time Management
Leadership
Effective Communication
Communication Skills
Adaptability
Fast Learner

HOBBIES

Coding Practice
Travelling

LANGUAGES

English
Tamil

- **Participated in GENESIS**, a College-Level Hackathon, and developed an innovative solution while gaining practical exposure to teamwork and problem-solving.

TECHNICAL SKILLLS

Technologies

- Languages: Python ,Core Java
- Front End Technologies: HTML, CSS
- Internet of Things (IoT)

PROJECTS

Project Title 1 : **Smart Battery Monitoring System for EV Two-Wheelers**

Technologies Used : **HTML, CSS, JavaScript, IoT Sensors**

Description : The Smart Battery Monitoring System is a web application designed to track **EV battery parameters** like **voltage, current, temperature, and state of charge in real-time.** It allows users to monitor battery health through a user-friendly dashboard. The system performs data analysis and triggers alert mechanisms to detect abnormalities, prevent battery failure, and improve safety and battery life efficiently.

Project Title 2 : **AI-Enabled Online Reprography System for Educational Institution**

Technologies Used : **HTML, CSS, JavaScript, Python, AI/ML Concepts**

Description : The AI-Enabled Online Reprography System is a web application developed to automate printing and photocopy services in colleges. It allows students and staff to **upload documents, track orders, and make payments online.** The system uses AI for document quality enhancement, smart queue management, and automated cost estimation. It reduces manual work, minimizes waiting time, and improves overall service efficiency
