EDUCATION

- **Vivekanandha College of Engineering for Women, Namakkal** **2022 - 2026**
  B.E - Computer Science and Technology – CGPA : **8.62/10**
- Government Higher Secondary School, Salem **2021 - 2022**
  H.S.C - Percentage : **76.8**
- Government Higher Secondary School, Salem **2019 - 2020**
  S.S.L.C - Percentage : **80.6**

EXPERIENCE

1. SOFTWARE DEVELOPMENT INTERN - KANINI SOFTTECH **June 2025 - July 2025**

- Developed RESTful backend APIs for a Real Estate ERP system to support property management and business operations.
- Collaborated with frontend developers to integrate backend services, ensuring seamless communication between application components.
- Implemented and tested API endpoints to enable reliable data exchange and smooth application functionality.
- Utilized Postman for API testing and validation during the development process.
- **Tech Stack:** Java, REST APIs, Postman, MySQL

2. UI/UX INTERN - CODSOFT **May 2024 - June 2024**

- Designed intuitive mobile application signup flows using Figma, focusing on user-friendly and responsive interfaces.
- Developed responsive login pages, dashboard layouts, and email templates using HTML and CSS.
- Applied modern UI/UX design principles to create consistent and visually appealing user experiences.
- **Tech Stack:** Figma, HTML, CSS

PROJECTS

1. MULTIDURG RESISTANT (MDR) INFECTION SURVEILLANCE AND CONTACT TRACING

- Developed a healthcare application to centralize MDR infection patient and laboratory information for easier monitoring.
- Implemented contact tracing to record potential exposure details and support follow-up of related cases.
- Built RESTful APIs for patient management, laboratory reports, contact tracing, alerts, and risk assessment.
- Added rule-based risk assessment and alerts to identify potential high-risk cases for timely review.
- Developed a modular backend with MySQL integration to reduce manual data handling.
- **Tech Stack**: Java, Spring Boot, REST APIs, MySQL, Postman

2. SMART PROPERTY LOCATOR PORTAL

- Developed a full-stack web application for location-based property discovery using React.js and Django.
- Implemented interactive property search, comparison features, and intuitive navigation to improve user experience.
- Designed backend functionality to manage property listings and support future price insight features.
- **TechStack**: React.js, Python Django Framework

SKILLS

- **Programming Languages** : Java
- **Backend Technologies** : Spring Boot
- **Databases & Query Languages** : MySQL, SQL
- **Tools** : GitHub, Postman

AWARDS & ACHIEVEMENTS

- Won First Prize in Paper Presentation and Second Prize in Project Expo at the National Level Symposium, Salem College of Engineering and Technology | Oct 2025.
- Won the National Golden Award at Quality Circle Forum of India | July 2024

POSITIONS OF RESPONSIBILITY

- Served as Institution's Innovation Council (IIC) Coordinator, organizing technical workshops and coordinating with industry professionals.
- Contributed as an Executive Member, supporting departmental activities and student initiatives.

CERTIFICATIONS

- Java Software Developer | Infosys Foundation | August 2025
- Full Stack Development | GUVI | September 2024
