SUMMARY

I want to work in setting up, repairing, and checking medical equipment. I am interested in gaining hands-on experience in healthcare technology and biomedical systems. I will make sure medical devices are safe, give correct results, and work properly.

INTERNSHIP

Medical Equipment Maintenance

Government Medical College Hospital - Virudhunagar I 2024 - June

- Studied common faults in hospital equipment and understood their causes
- Learned the basic working and use of ventilator, infusion pump, CT scan, defibrillator, autoclave, and centrifuge
- Developed practical exposure to biomedical equipment

Biomedical Technician Intern

Meenkshi Mission Multi-Speciality Hospital - Madurai | Jan 2026 - Jan

- Learned the working of laboratory and hospital equipment such as CBC analyzer, centrifuge, patient monitoring system, microscope, and hematology analyzer
- Understood different types of test tubes (anti-clot and clotting) and their uses
- Studied internal parts of machines by observing opened equipment and learned how each part works
- Gained basic practical knowledge in handling and understanding biomedical equipment

EDUCATION

HSC
KVS Higher Secondary School – Virudhunagar
Percentage – 72 %
June 2022 – May 2023

Bachelor of Engineering
VSB Engineering College
Current CGPA: 7.67
June 2023 – May 2027

Project
Title – Mini Portable ECG
Designed a portable ECG machine to display the electrical activity of the heart.
Learned basic signal acquisition, processing, and display of heart signals.
Focused on making the device simple, compact, and easy to use.

SKILLS

- Handling and observing hospital and lab equipment
- Data observation and problem analysis
- Hands-on learning in a hospital/lab environment
- Management
- Problem Solving
- Electronics and biomedical instrumentation
- Signal understanding (heart electrical signals)
- Building and testing
- Creative Thinking

INTEREST

- Creative Thinking
- Watching an interesting movie
- Helping Others
