DEVADHARSHINI K

Data Analyst · SQL · Python · Power BI · Excel · ETL · Data Visualization

Salem, TN | Immediate Joiner | +91 6379006252 | devadharshu12@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

B.E. CS graduate (May 2026, CGPA 8.4) with expertise in SQL, Python, Power BI, and Excel. Delivered end-to-end analytics pipelines across 55,000+ records. Published IEEE conference paper (TQCEBT'26, CHRIST University Pune). Completed Deloitte & Quantium simulations via Forage. micro1 AI Certified in Business Analytics & Operational Data Analysis. Targeting Data Analyst / BI roles focused on ETL pipelines, KPI monitoring, MIS reporting, and stakeholder communication.

TECHNICAL SKILLS

Query & Programming: SQL (CTEs, Window Functions, Joins, Query Optimization) · Python (Pandas, NumPy, Scikit-learn, Matplotlib)

BI & Reporting: Power BI (DAX, KPI Dashboards, Drill-through) · Excel (Pivot Tables, VLOOKUP, Power Query, Dashboard Automation) · Tableau

Analytics: EDA · Customer Segmentation · K-Means Clustering · Churn Analysis · A/B Testing · Cohort Analysis · Funnel Analysis · Ad hoc Analysis · Data Wrangling · ETL Pipelines · Data Cleaning · Statistical Analysis · MIS Reporting · KPI Monitoring · Stakeholder Reporting · Data Validation · Reporting Automation · Data Warehousing Concepts · Data Lineage

AI-Augmented Workflow: ChatGPT, Microsoft Copilot for SQL query optimization and EDA acceleration.

PROJECTS

Bank Customer Churn Analysis *SQL · Python · Power BI · Excel*

- Engineered SQL CTE pipelines across 10,000+ bank records — surfaced age group 46–60 (51% churn), Germany (32%), and high-balance segments (25%) as top churn risk factors
- Applied K-Means clustering to segment customers into VIP (307), At-Risk (377), and Passive (316) cohorts for targeted retention prioritization
- Automated ETL-fed Power BI and Excel KPI dashboards across all 3 customer segments, streamlining MIS reporting workflows

E-Commerce Sales Analytics — $158M Revenue Dataset *Power BI · SQL · Excel*

- Architected a 2-page Power BI dashboard (55K orders, $158M GMV) with DAX measures, drill-through, and cross-filtering for executive decision-making
- Ran SQL aggregations to rank Electronics ($47M) as top revenue category; flagged Mumbai & Delhi as highest-grossing markets for campaign planning

Customer Funnel & Retention Analytics *Python · Statistical Analysis · A/B Testing · Live Dashboard*

- Analyzed 9,200+ user events across View → Cart → Purchase funnel; pinpointed 62% cart drop-off as primary conversion leak
- Developed cohort retention analysis tracking 6 monthly cohorts across M1–M3; revealed a ~50% Month-1 drop as key re-engagement window
- Designed and validated A/B test (two-proportion z-test) on checkout flow — confirmed statistically significant 12.5% conversion lift ($p<0.05$)

Retail Sales Executive Dashboard *Excel*

- Created an Excel MIS dashboard with Pivot Tables, KPI cards, and slicers tracking $2.26M in retail sales across categories and regions
- Determined November as peak month and Phones as top sub-category; recommended Q4 Technology inventory prioritization from trend analysis

EXPERIENCE & RESEARCH

Conference Paper · IEEE TQCEBT'26 · CHRIST University Pune — Apr 2026

- Co-authored and presented 'A Hybrid Transformer-CNN-LSTM Deep Learning Framework for High-Accuracy Non-Intrusive Load Monitoring' at Third International IEEE Conference (TQCEBT'26); contribution: research writing and online presentation

Data Analytics Trainee · PySpiders — Bangalore — Jan 2026 – Apr 2026

- Completed a structured 4-month training program (Jan–Apr 2026) in Python, SQL, Power BI, and Excel through guided coursework and practice exercises

Business and Data Analytics Intern · YBI Foundation (ISO 9001 Certified) — Aug 2025

- Performed EDA and data cleaning on structured datasets using Python (Pandas) and Excel; identified trends and derived actionable business insights through visual reports (1-month internship)

EDUCATION

B.E. Computer Science & Engineering — 2022 – 2026

Tagore Institute of Engineering and Technology, Anna University

CGPA: 8.4 / 10 · HSC: 89.7% · SSLC: 97%

CERTIFICATIONS & ACHIEVEMENTS

- Deloitte Australia Data Analytics Simulation — Forage, 2026 — Tableau dashboard on factory downtime; identified Seiko as highest-downtime factory
- Quantium Data Analytics Simulation — Forage, 2026 — customer transaction patterns, benchmark store selection, Category Manager insights
- micro1 AI Certified — Business Analytics & Operational Data Analysis, June 2026 — verified for SQL, Python, Excel, Power BI via AI technical evaluation
- Python Programming — Great Learning · AI-Powered Vision (OpenCV) — Novitech · AI Fundamentals — Marcello Tech
- Solved 100+ SQL problems on HackerRank — Window Functions, CTEs, Query Optimization
- Data Analytics by Google (Nov 2025) & Microsoft Office Essentials (May 2025) — Naan Mudhalvan Program, TN Skill Dev. Corp.
